To be honest the one who interest me more was the "golden universe".

I can say everything is imposable,

Life, Death...

its just so difficult to believe,

everything is golden ratio, ~~maths~~

multivers, universe, the stars over sky

our faces, everything that exist and

will exist has perfection just like universe

As we study those characters we learn

great things about our lives

I mean about our beautiful world.

Everyone shall learn about it and start

to Respect this life and the future

beings ~~after~~ for those after us.

Or in your words this world,

Geometrical sizes and everything this

book writes can help some people understand

our world easier than those who didnt

even managed to lay a finger

in this book and thats makes me

think why?

Children shall learn, i mean they shall  
learn about it at school,  
and did you know that some greek  
schools doesnt do arts or music  
and that makes kids upset in what way?  
they cant learn to respect and  
find theirs clothes and also cant have  
an hour. Just an hour music  
and art. so their minds  
understand harmony and this harmony  
order their peaceful minds.  
Thats all i wanted to say.
