

An eagle and hawk are wild birds. They live in the forests of Scotland. They are big and fast birds and they eat small animals.

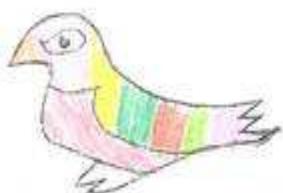

These are hummingbirds. They live near the lakes of England. They can sing and they eat worms and seeds.

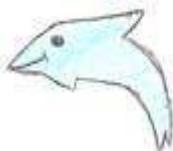

This is the thistle of Scotland. It is purple.

The deer lives in the forests of England and Scotland. It eat grass. It's a beautiful animal but it's in danger!

The puffin lives on the beaches of the North Sea. It nests in Scotland. It eats small fish.

The dolphin and the seal live in the North Sea too. They eat small fish, or tipises and squid. The seal nests on the beaches of Scotland.

Silverpelican

Hi, I'm Argiris the silverpelican.

We live in central Europe, but in winter we travel in Greece.

Here, we live in the lakes Kerkini and Prespes.

I weigh 11 kilos and my wings are 3 metres long when they are open.

My nest is near the water in the straws.

My babies pelican are grey and black, not white.

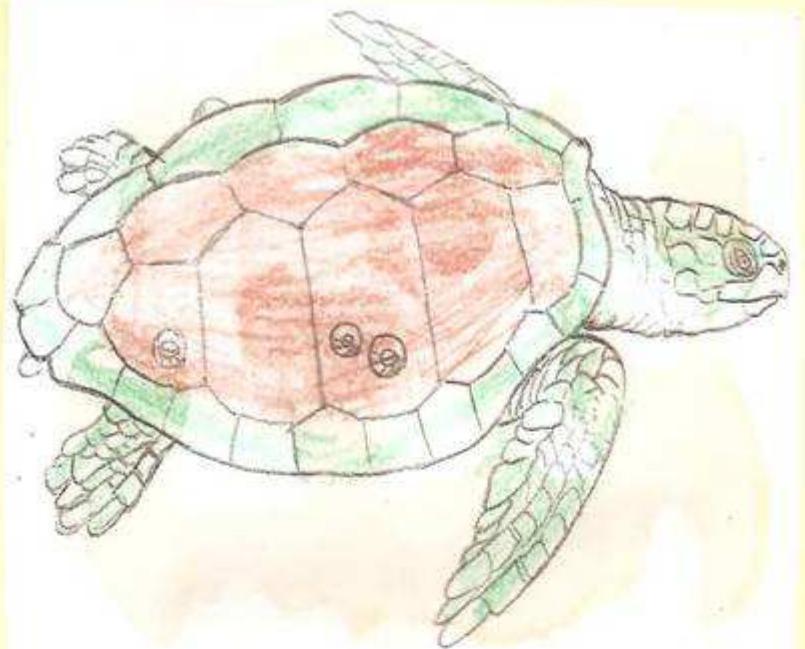

We feed them small fish and we teach them swim.

But, we are in danger.

There are 500 pairs in Greece today. Can you help us?

Hi! I'm Argiris, the Silverpelican.
I live in central Europe but in winter, I travel to Greece. Here, I live in the lakes Kerkini and Prespes. I weight 11 kilos and my wings are 3 metres long when they are open. My nest is near the water in the straws. My babies pelicans are grey and black not white. We feed them small fish and we teach them to swim. But we are in danger. We are only 500 pairs in Greece. Children can we help us, please?
