# GLOBAL VILLAGE

**CHATZI AGELIKI C3'  
SFOUGARI ARGYRO C3'**

Through all the subjects, the most interesting for us was the global village. In our days something that attracts people's interest is the globalization.

Moreover when we heard the subject, we liked it very much and we thought about making a construction which represents a «GLOBAL VILLAGE».

**We also thought that it would be a great idea to consult children from other countries by using the online program Rafi.ki. So, we used all the information they gave us and mostly those about their traditional clothing and their traditional houses in order to start creating our construction.**

**In this construction we have created traditional houses from all over the world such as: Greece, India, New York, Africa, China, South America and North Pole. Also, we have added children from the corresponding countries. Each child will be standing in front of a house which is from a different ethnicity from his own. This way all the children will be apart and at the same time united.**

The materials we used were: plasticine, wood, cardboard, plaster and acrylic colors.

We hope that you will like our creation !!!
