Union INSPIRATIONS

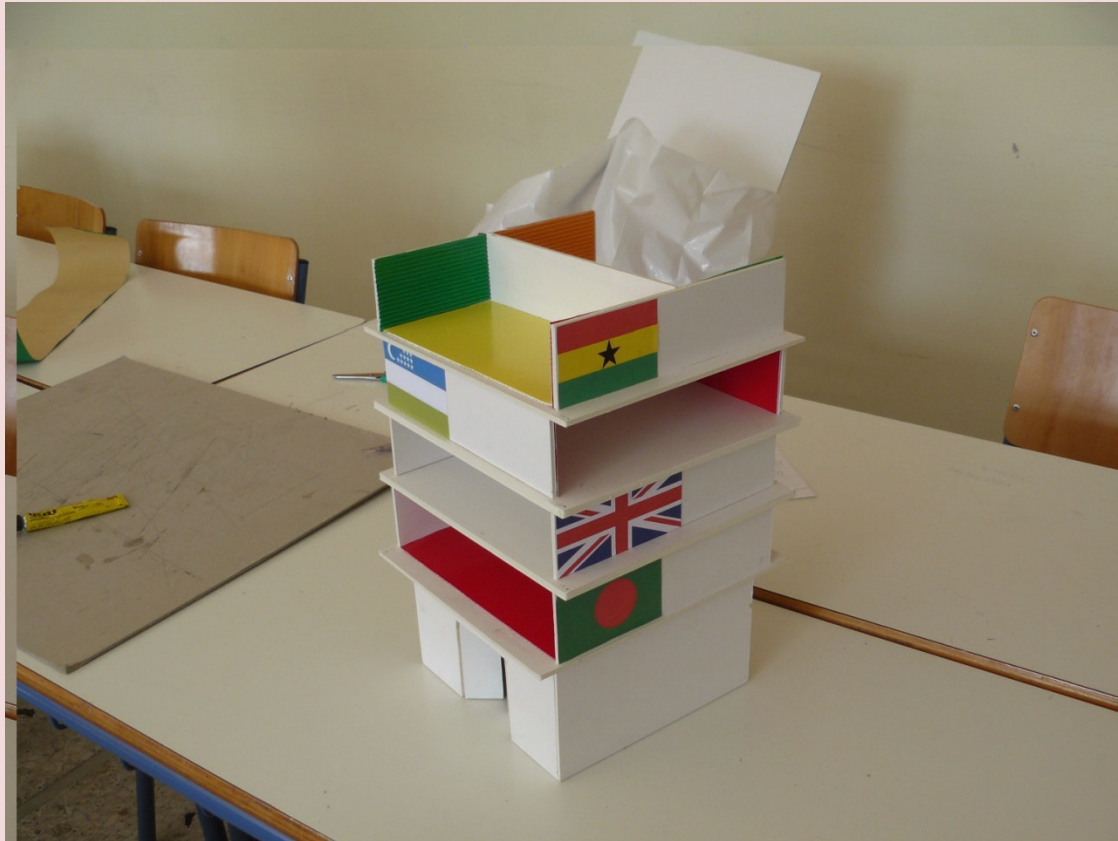

CHATZI DAKI IRINI A3'

In my construction are shown flags and house furniture from eight countries, with which we are collaborating

These countries are United Kingdom, Serbia, India, Morocco, Uzbekistan, Bagladesh, Ghana from Europe, Asia and Africa in my try to symbolize the union of the people and the acceptance of the difference.

Materials

For the building I used paper for sketch and for the roof I used: toothpicks, leafs form an exotic tree, cardboard and sliced paper. I also used paper for the flags and for the walls color.

My communication with foreign children in the site rafi.ki helped me to understand the difference between the cultures various countries may have and why they should be united.

This gave me the idea to make a building in which every apartment would be separated in two parts. In the one part there is the style of one country and in the other another. That symbolize the unity nations must have!
