“Rich vs Poor”

KOLLINIATI ELENI A2'

KOSMOPOULOU MARILENA A2'

The difference between the developed and the undeveloped countries is becoming keener. The rich people are becoming richer and the poor ones poorer. This is why we decided to show to the rest of the world that the chasm between these different worlds is becoming more and bigger.

Based in that we made that body to make people understand that we must care about everything that has to do with the human's existence: poverty, wealth, happiness, miserableness, justice, peace...

Our communication with kids from different countries through the website "rafi.ki" helped us very much.

MATERIALS: 3 paper boards (1m x 1m each one), glue, 4 packets of gesso, 1 flesh coloured cloth, 5 pictures showing poor people, 5 pictures showing diamonds.

STEPS OF OUR CONTRACTION:

1st step: we cut the paper boards into shapes of the human body(without the hands, the head and a big part of the leg).

2nd step: we connected the 3 paper boards with small pieces of paper board (3cm x 3cm) with glue.

3rd step: we covered the surface and we formed the curves of the body with gesso.

4th step: we clothed the construction with the flesh coloured cloth.

5th step: we stuck the pictures with the special glue for clothes.
6th step: we draw technical chinks with a black pen.
