# A BETTER WORLD

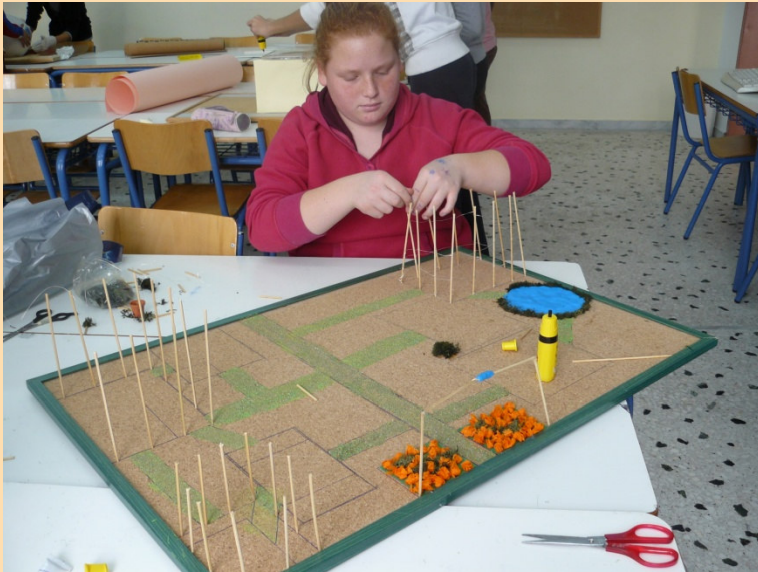

## “THE ZOO”

**KYRKMANI MATINA A3' –  
PETROGIANNI KATERINA A3'**

With our construction we want to show that animals aren't free anymore; because man exploit them. We use them at work and as food. In addition we buy them as pets or we close them in the zoos.

During the process of our project we used Rafi.ki to communicate with students from other countries. The students gave us some ideas for our project. And help us to imagine our zoo.

**First we made the preliminary draft. Moreover we bought in the materials that we will need. Then we drew above in the dash the points where will enter the cages, the paths the lake etc. We still drew a small garden in the entry. Dyed the cages and the paths and threw from on sand. We made a lake and put around the grass lawn.**

**We made new douches with lawn. Also we make a brown gate and bleu label; witch says “The zoo”. We manufactured cages with sticks and wire. Later we stock many small trees and animals in the cages. At the end we made a label that says our names (Catherine & Matina) at English and at Greek.**
