

■ Once Upon a Number

Where stories, numbers, and imagination meet!

Welcome to our eTwinning project —
a creative journey through fairy tales, mathematics, and theatre!

■ What is this project about?

We explore mathematical concepts in the most magical way — through storytelling and performance. Using fairy tales, rhymes, puppet theatre, shadow theatre, kamishibai, and object theatre, children play, create, learn, and perform.

■ Our Goals

- Inspire a love for numbers and problem-solving
- Encourage language development and artistic expression
- Promote collaborative learning across cultures
- Create interactive performances and digital products

■ Let the adventure begin!

We are thrilled to start this journey with all of you. Let's read, play, and discover the hidden magic of mathematics inside stories!

Warm greetings from the Once Upon a Number team
