

① Everybody must make an effort to save nature. To do this, all people must recycle in order not to pollute the planet. Do you want to help? In bins like me, you will become useful for people!

④ Recycling bins can recycle: glass, paper, aluminium and plastic. Unfortunately rotten apples are recycled in special bins for foods. OK?

FORESTS

If we destroy trees, we will not have fresh air and we will destroy the environment. That's why there are rules which we have to follow. We mustn't cut trees and we mustn't start fires in forests.

SAVE THE TREES!

Pollution

Waste gases come from cars and factories
Factories and cars pollute:

- 1) The air
- 2) The water
- 3) The forests

The best thing we must do is to buy cars that take energy from the sun. Or we mustn't use cars very much.

Also, factories must buy filters.

ANIMALS
IN

DANGER

Monachus

Monachus

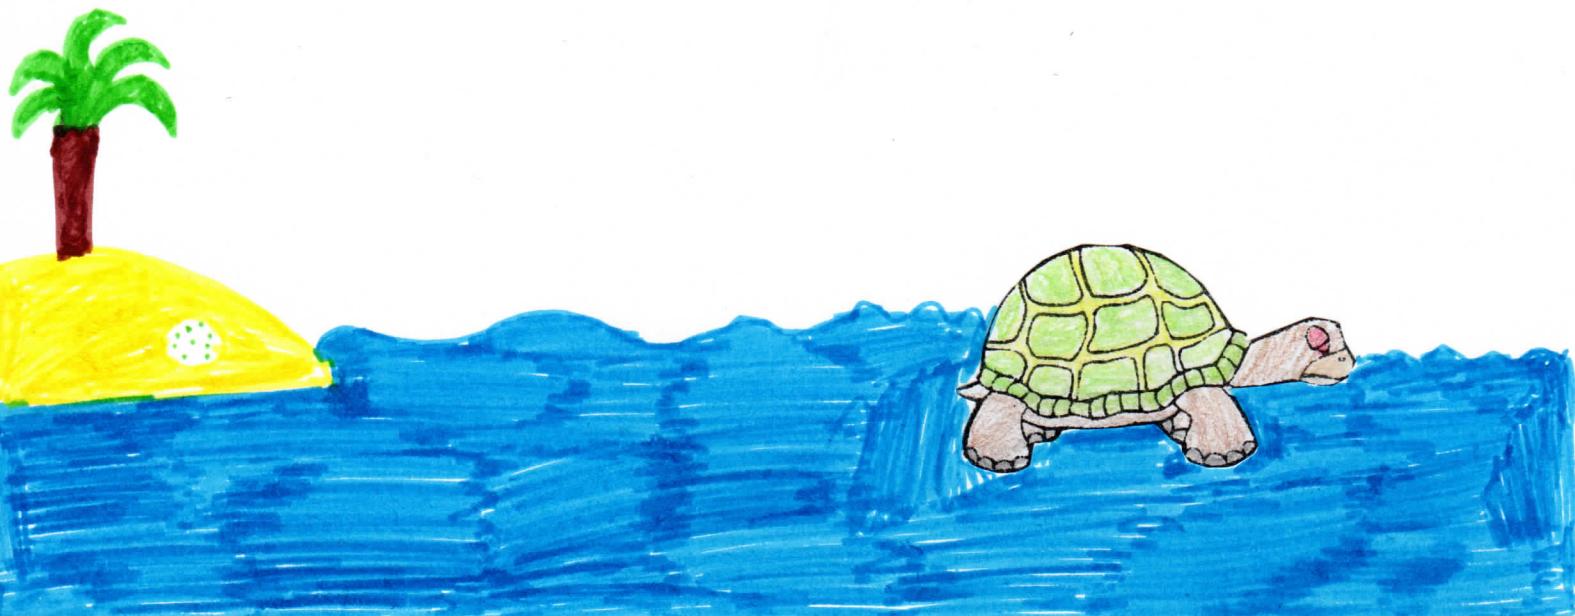

The seal is *monachus monachus* lives in the Mediterranean sea. It is an animal under threat. There are about 600 *monachus monachus*. 250-300 *monachus monachus* live in Greece. It is 2-3 m. long. It weighs 350 kilos. It is grey, dark brown or black. It lives 45 years.
