

# Parental involvement

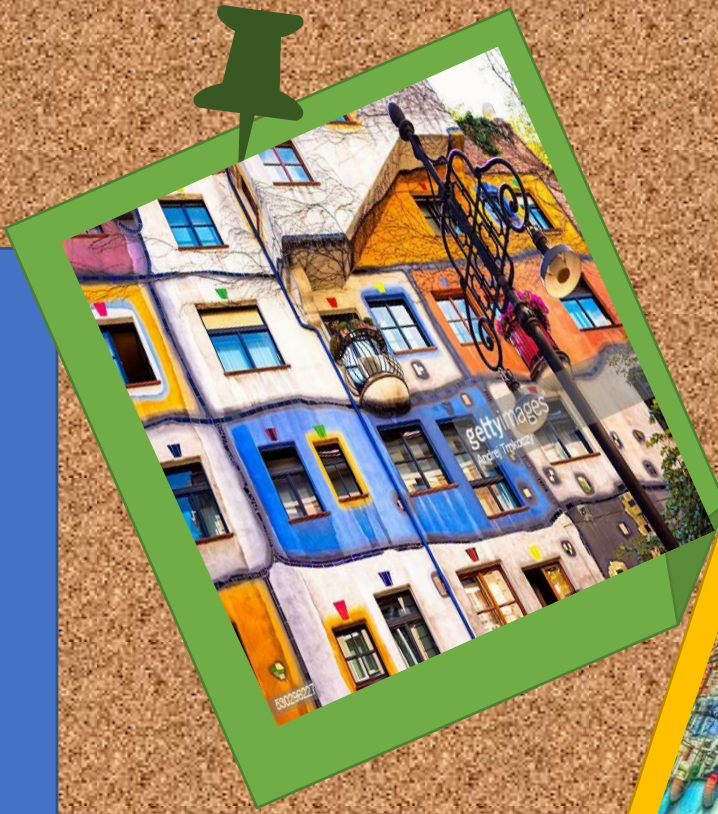

- Over the weekend our students' parents received an email asking them to get involved...

This weekend think smart with your parents and built a house that looks like Hundertwasser's and is all from recyclable materials and "junk"! Look for boxes, cardboard boxes, plastic packaging and whatever other "trash treasure" you can find in your house, think smart - for example trees on the roofs - and create houses for a magical and smart city, where people are happy to live!
