

## How Do Glow Stars Work?

## 🌟 How Do Glow Stars Work? 🌟

Have you ever seen those little stars that glow in the dark on the walls or ceiling?

They look like magic, right?

But they're not magic—they just know how to **catch and hold onto light!**

🌟 We experiment with our own glow stars,  
by writing the first letter  
of our name...

🌟 Trying to create our very own  
**constellations!** 🌟

## ✨ They Absorb Light! ✨

During the day or when the lights are on, these stars soak up the light, like a sponge soaks up water.

☀️ How Do Glow Stars Work? ☀️

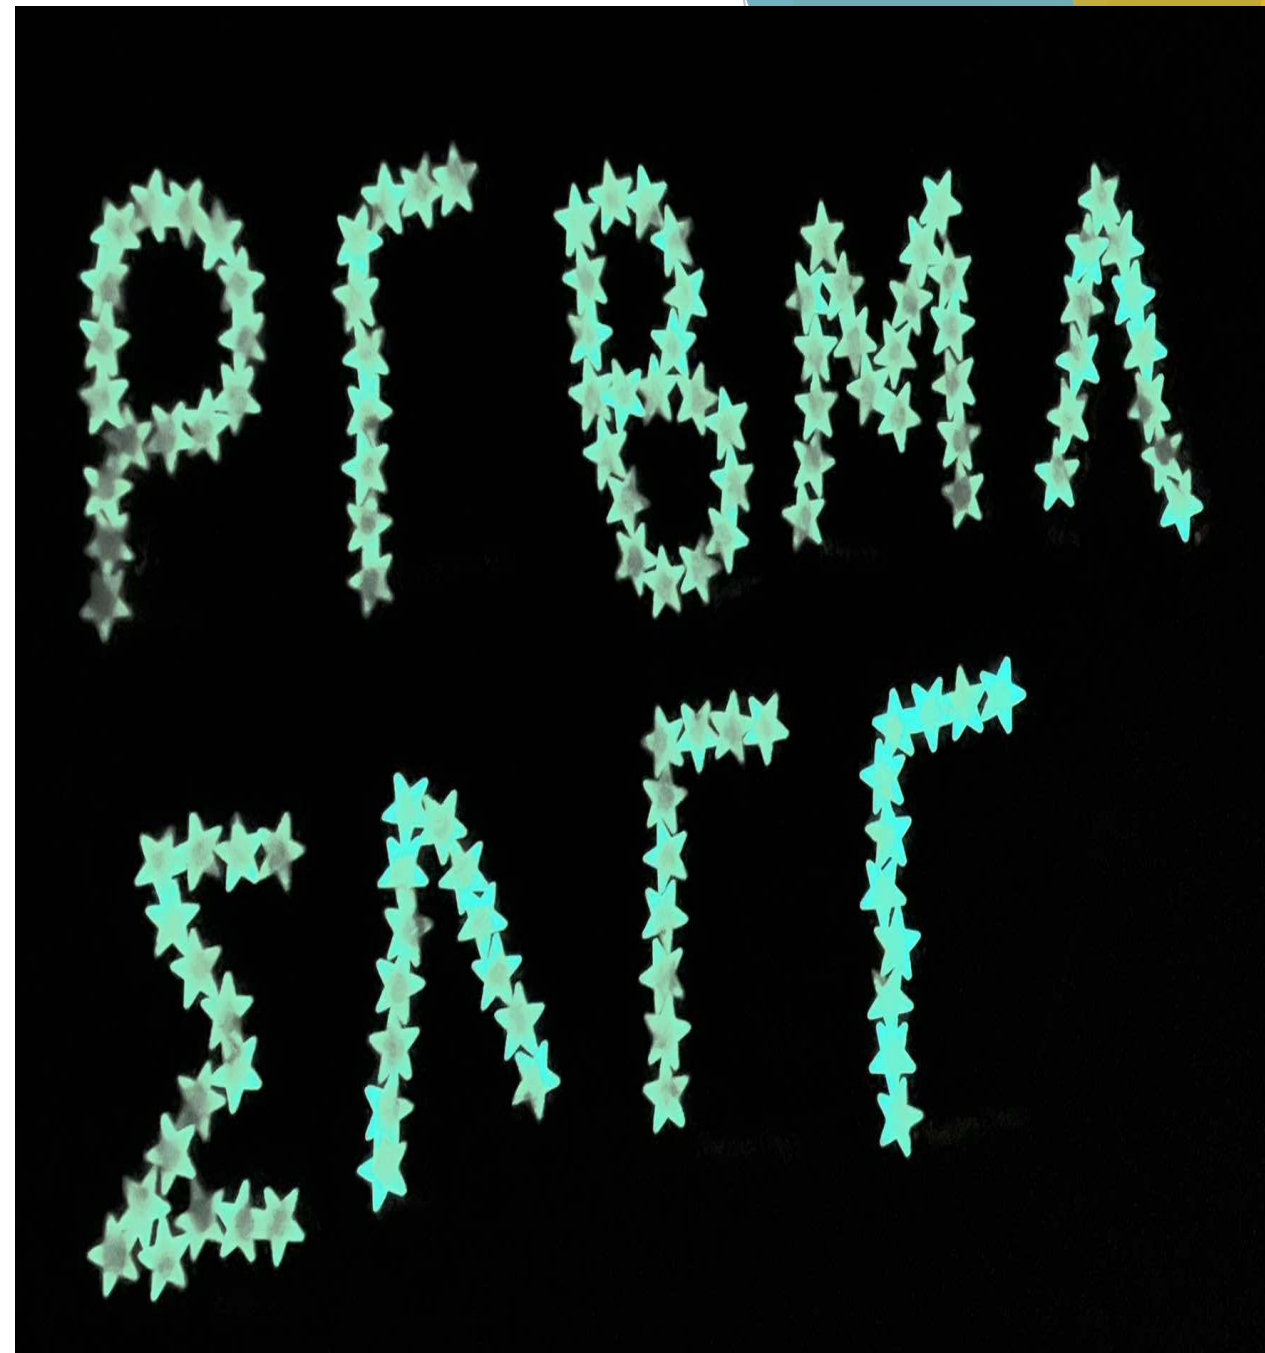

## 💡 They Give the Light Back! 💡

When you turn off the lights,  
the stars slowly  
let the light go.  
That's why they glow in the dark!

## 🔄 Charge and Glow Again! 🔄

If they stop glowing, just shine a light on them again, and they will be ready to glow once more!

It's like a little light secret they keep and share with us when it gets dark. 😊
