

🌍 Global Action Days 2025 –

Discovering the Magic of

Earthworms 🌱

Global Action Days 2025 – Discovering the Magic of Earthworms

As part of Global Action Days 2025, our kindergarteners will embark on an exciting journey to learn about earthworms and their important role in nature.

Earthworms may be small, but they are true soil heroes!

They help plants grow by breaking down dead leaves and making tunnels underground that let air and water reach the roots.

We will begin by exploring real soil with our hands, observing how it feels and imagining where worms live. Children will enjoy engaging visuals and short videos showing earthworms at work.

To make the learning even more memorable, we will create “edible worm gardens” using cookie crumbs as soil and gummy worms to show how worms move and live beneath the ground — and enjoy a tasty treat at the end!

This fun and educational activity will help children appreciate the importance of even the smallest creatures in keeping our planet healthy.

Together, we will celebrate the wonders of nature and take part in caring for our Earth during Global Action Days 2025!

Let's dig deep, learn, and have fun together!  

Can you draw earthworms?

🌍 Global Action Days 2025 –
Amazing Plants Protect Our
Planet!

As part of Global Action Days 2025, our kindergarteners will explore the wonderful ways that trees, shrubs, and plants help keep our Earth safe and healthy!

Through fun and hands-on activities, children will learn how plants filter water, stabilise the soil, and reduce flooding and pollution.

We'll discover how plant roots hold the soil together, stopping it from washing away when it rains, and how leaves and branches slow down rainwater, protecting our rivers and lakes.

We will also talk about how plants provide cool shade that helps water stay in the ground and not evaporate quickly under the hot sun.

Children will participate in playful experiments, like making a mini “rainstorm” to see how plants protect the soil, and they will explore real plants up close to see how they help prevent floods and our environment.

By celebrating nature's helpers, children will understand that even the smallest plant plays a big part in keeping our planet clean and safe.

Together, we will learn, play, and grow as environmental heroes during Global Action Days 2025!

Let's explore, protect, and love our amazing Earth!

Global Action Days 2025 –

Learning from the Past to

Grow Our Future! 🌱

Global Action Days 2025 – Learning from the Past to Grow Our Future! 🌱

As part of Global Action Days 2025, our kindergarteners will take part in a special project exploring bioeconomy — using nature’s gifts to create sustainable, healthy ways of living. 🌍

Through this activity, we will bring all ages together! Children are invited to connect with older family members and community elders to learn about traditional ways people cared for the Earth. They might hear stories about how food was grown, how fruits and vegetables were preserved without waste, or how people used natural resources wisely.

Each child will “interview” an elder by asking simple questions about farming, gardening, cooking, or taking care of nature in the past. They can draw a picture or bring a small item (like a photo, seed, or traditional food) to share with the class.

By learning from the wisdom of past generations, children will discover how nature-friendly practices can help build stronger, more resilient ecosystems for the future. 🌿

Together, we celebrate the importance of respecting nature, listening to stories, and growing a cleaner, greener world — hand in hand across generations!

🌍 Let’s learn, share, and care for our amazing Earth!

Draw a picture or bring a small item (like a photo, seed, or traditional food) to share with the class.

Global Action Days 2025 – See
the World Through Nature's
Eyes! 📷 🌳

Global Action Days 2025 – See the World Through Nature’s Eyes! 📷 🌳

For our fourth Global Action Days 2025 activity, we invite our young explorers to grab a camera or mobile phone and become nature photographers! 📷

This time, we are asking children to imagine they are animals, trees, or even tiny insects looking at our world. What would they see? Maybe a bird flying over a park notices litter on the ground, or a squirrel in a tree sees broken branches where a forest once grew.

With help from families, children will take creative photos that show the planet’s problems from a new point of view — a nature’s-eye view! We encourage them to get low to the ground like a beetle, peek through branches like an owl, or hide in the grass like a rabbit. 🐦 🌿

Through these fun and imaginative adventures, children will connect with nature and learn how important it is to protect our Earth. Later, we will share and celebrate their wonderful photos and talk about ways we can help make the world better for all living things.

🌍 Let’s open our eyes, hearts, and cameras to see our community through nature’s eyes!

Bird's Eye View

Take a photo looking down at the ground — what would a bird flying above see?

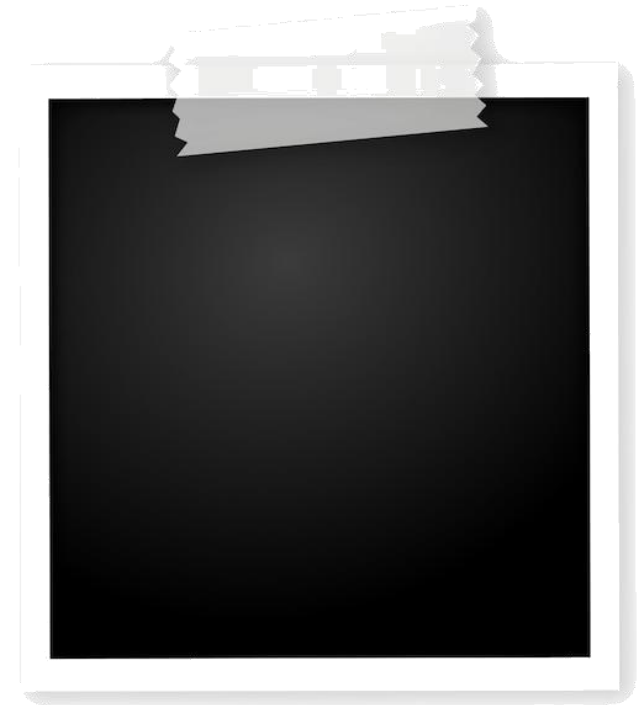

Tree's Branch View

Peek through the branches of a tree. What would a tree see if it looked at the world around it?

Small Animal View

Get down low! Take a picture from the ground, like you're a hedgehog or a rabbit. What does the world look like from way down there?

Global Action Days 2025 – Throw a nature-inspired party! A

Special Nature Trip! 🌿 🌸

Εξόρμηση στην Φύση!

ΠΟΥ?

Πρώην Στρατόπεδο Καρατάσου

ΠΟΤΕ?

Κυριακή 04/5/2025 στις 11:00
στην είσοδο-Λεωφόρο Στρατού 37

Σας προσκαλούμε όλους για μια
εξόρμηση στην φύση με σκοπό:

1. Να καθαρίσουμε το δασάκι,
2. Να φυτέψουμε λουλούδια και
σποράκια για τις μέλισσες,
3. Να φτιάξουμε χελιδονοφωλιές
για τα χελιδονάκια,
4. Να δημιουργήσουμε land art,
5. Να παίξουμε και να κάνουμε
πικ-νικ!

32ο Νηπιαγωγείο Θεσσαλονίκης

Global Action Days 2025 – Throw a nature-inspired party! A Special Nature Trip! 🌿 🌸

As part of Global Action Days 2025, we are excited to invite all our kindergarteners and families to a wonderful day out in nature! Together, we will help care for the Earth while having fun outdoors. 🌍 💚

During our nature trip, we will start by cleaning up the forest, picking up litter to make the environment clean and safe for animals and plants. Next, we will plant beautiful flowers and seeds to help bees find food and stay healthy. 🐝 🌻

We will also build cozy nests for swallows to give these amazing little birds a safe place to live. 🐦 Then, using leaves, sticks, and stones, we will get creative and make land art — special nature pictures that celebrate the beauty of the Earth!

After all our hard work, we will play games and enjoy a happy picnic together, sharing smiles and celebrating everything we did for nature.

This joyful day will teach children the importance of protecting our planet while building friendships and memories. 🌳 🌺

Let's be Earth Helpers, Nature Artists, and Wildlife Protectors — all in one amazing day!

Draw your best nature party memories!
