

eTwinning project "Little Scientists"

Our Collaborative Paintings

One of the challenges of our eTwinning project is to meet online in groups and play the collaborative games we have created, related to our topic "Colors".

The last activity in the video conference is to pick a random color by spinning the color wheel and co-create paintings with this/these specific color/s.

Here are the results of our collaboration and our little painters!

eTwinning project "Little Scientists" **Our Collaborative Paintings**

1st group

- 1) Ellinoagliki Agogi
