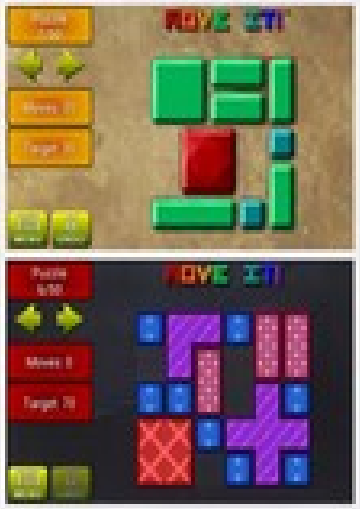
Move it! Free

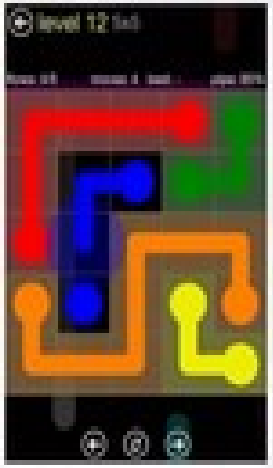
Παιχνίδι Λογικής
(Puzzle - Board)

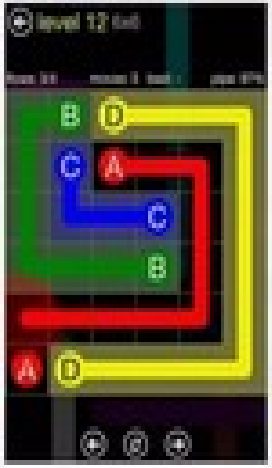


Move it! Free comes with 300 puzzles spanning 6 difficulty levels from Novice to Expert. Depending on level, it can be either a quick casual game or an extremely challenging puzzle. The goal is to get the red block out from the bottom corner to the exit by sliding the other blocks out of the way. Most block sliders are variants based around Yoshigahara's very famous and excellent Rush Hour game (the most well known being the Unblock Me). Move it! instead provides a richer variety of "tetris style" shapes that can move freely, not just in restricted planes.

Flow Free

Παιχνίδι Λογικής
(Puzzle)





Connect matching colors with pipe to create a flow. Pair all colors, and cover the entire board to solve each puzzle in Flow Free. But watch out, pipes will break if they cross or overlap! Free play through hundreds of levels (1,000 free puzzles), or race against the clock in Time Trial mode. Flow Free gameplay ranges from simple and relaxed, to challenging and frenetic, and everywhere in between.

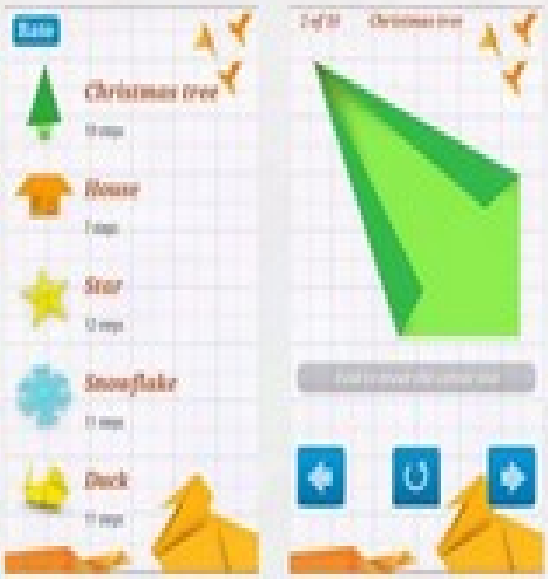
How to Make Origami

Παιχνίδι Κατασκευής
(Puzzle)



"OK, so everyone can fold paper in half. What's so exciting about that?" you may say. But you'll soon think differently when you learn more about the art of origami. Remember making paper airplanes at school? And remember how someone, instead of an airplane, made a flower, a jumping frog, or a parrot? And they only had their two hands and a plain piece of paper. Follow the step-by-step instructions and watch the 3D animation carefully.
