

CODE WEEK

COLLABORATIVE
ACTIVITY

**Little Robo mouse is
looking for food**

INSTRUCTIONS

Dear partners,

Let's create a code to guide our little Robo mouse toward the food it can carry to its pantry. Each of us will design our own code, but it will not be implemented by its creator — instead, another partner from the activity will execute it.

So, let's create our code proposals, and each partner will choose the one their students prefer.

Good luck and have fun!
