

4th Kindergarten
School of Megara

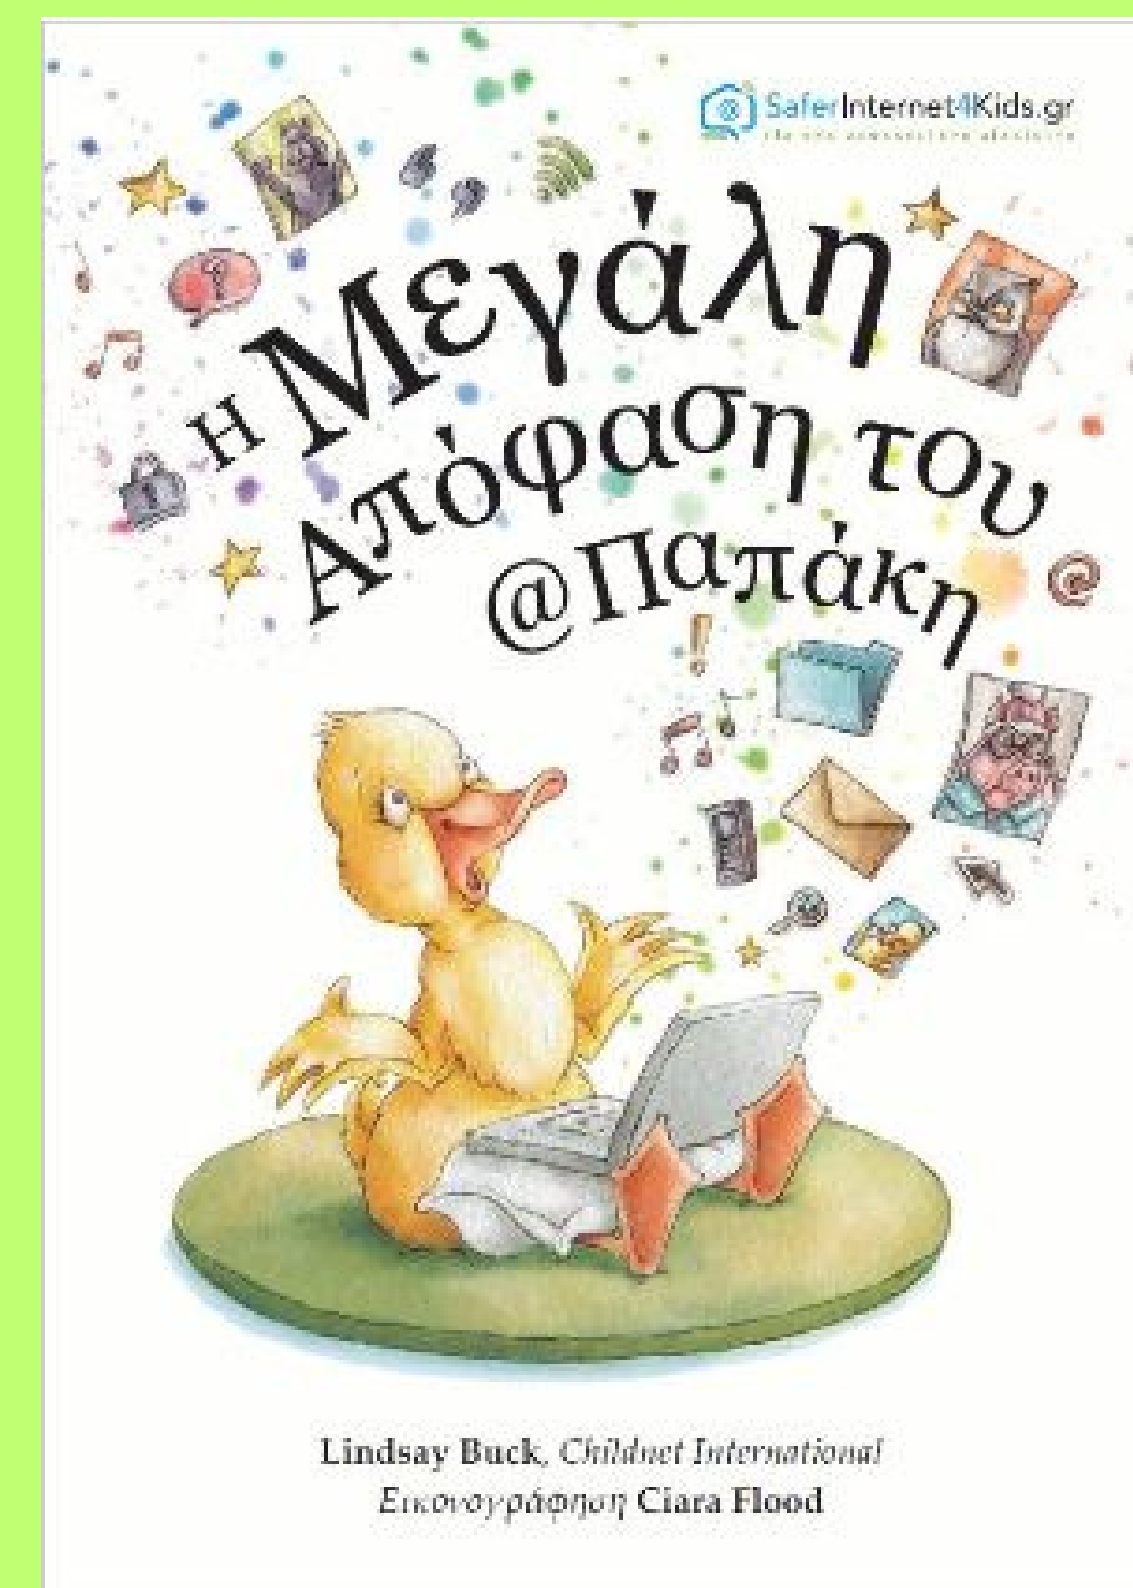

E-Safety

On the occasion of our kindergarten's participation in the European etwinning program, the two morning classes and the optional full-day class implemented activities for the safe use of the Internet!

First we read in class the story "Digiduck's Big Decision" It deals with the feelings of children on the internet and how easily something we think is funny can end up hurting our friends. The children reflected and expressed their personal experiences regarding the use of the Internet.

Then we watched the video “Safety on the Internet with simple words from Athena and Ermis” as well as an educational video for young children about cyberbullying. Through the creation of problematic situations, the children were led to find solutions for dealing with problems that may arise during the use of the Internet

In the interactive board the children found a way to cover their faces in their published photos!

Finally, we made our poster with the 10 rules of safe surfing on the Internet!
