Fake news

We want to show the dark side of the news that is fake and how it is shown differently to everyone.

Glasses- one asks :what do you see? And the other one says the truth...

we see different images as we want to see

The **girl** from the window

Being bullied on the net..

After many hours **internet abuse**, being bullied is very common, also being **threatened**

we see these results outside the school and on the road

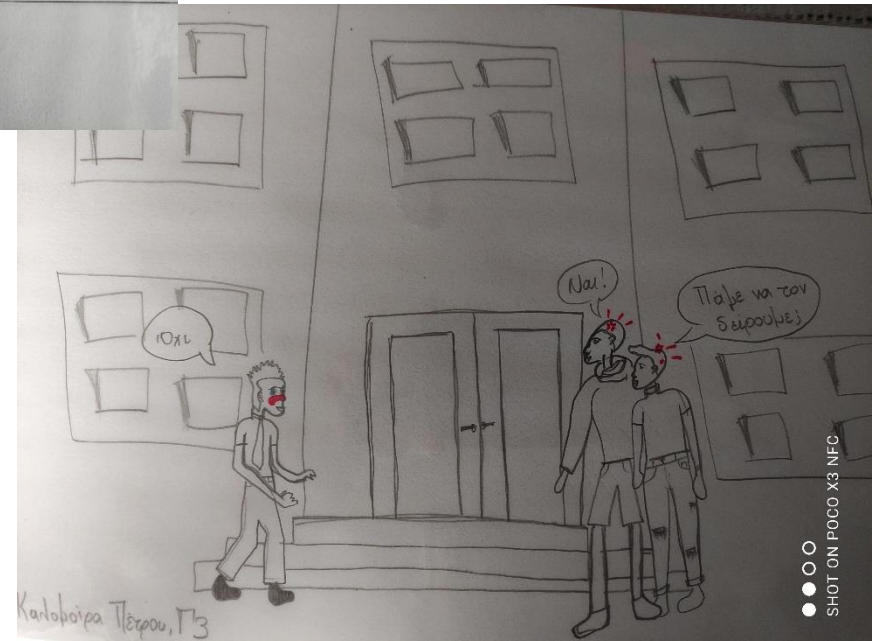

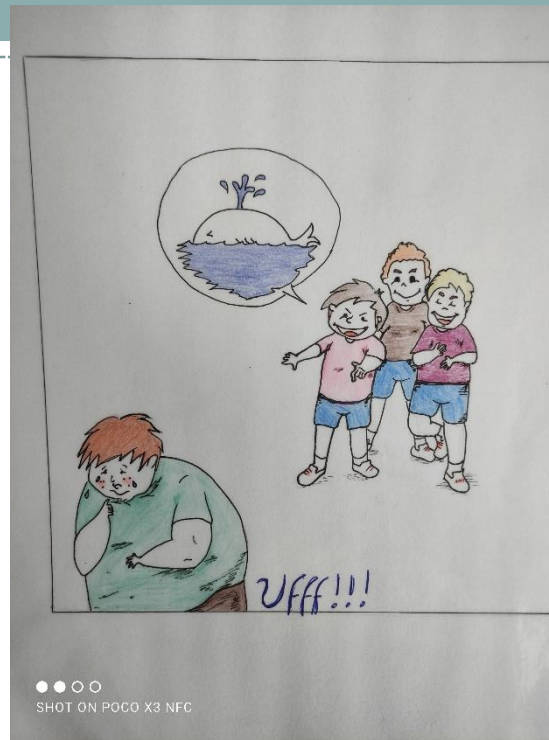

Being teased again.. (the cloud shows the image that the 3 boys had sent on the net)

The **second image** shows the threat they had already done to the boy on the left

Now they want to act against him.

-let's hit him...

-oh no....

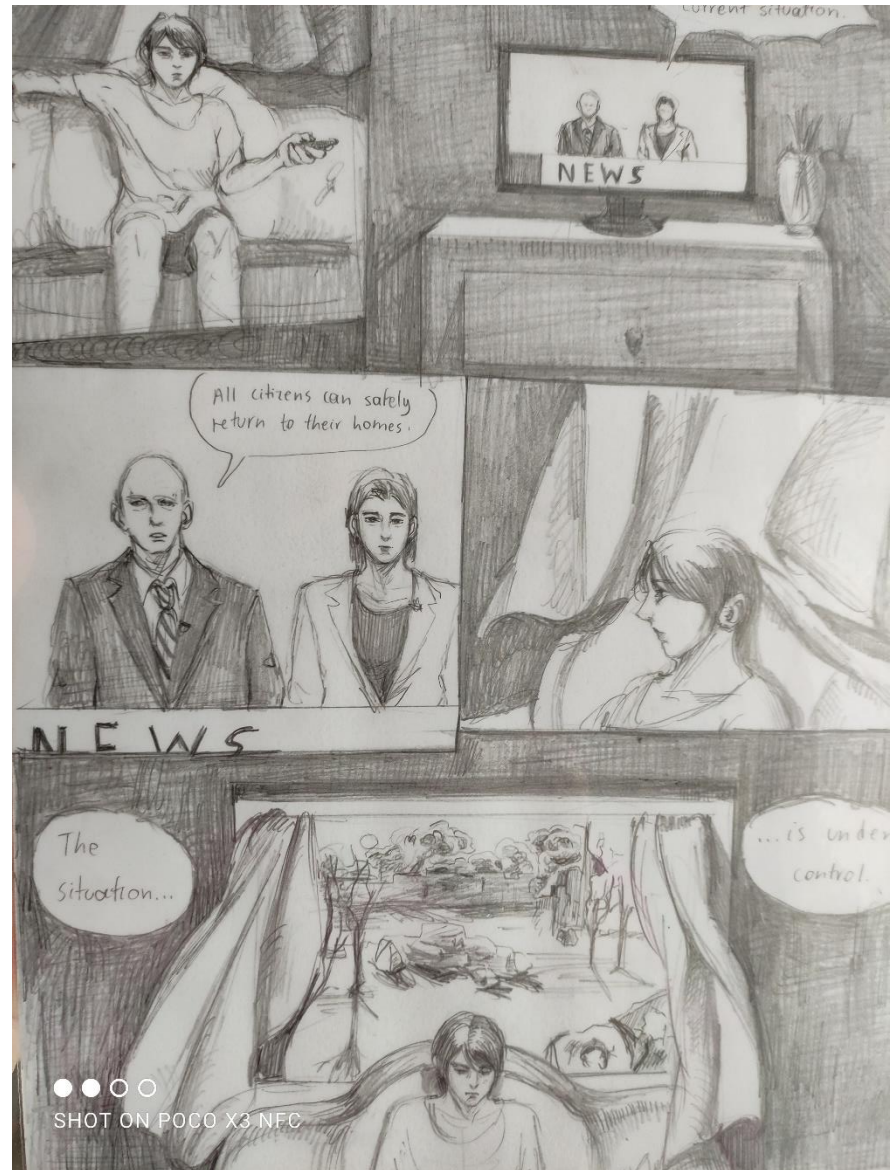

Fake new

It is shown the wrong way of being informed on the news about the Ukrainian War

and the way the girl thinks of the reality herself inside the window frame (everything is ruined)

She is very sad and is saying ironically :

-the situation is under control

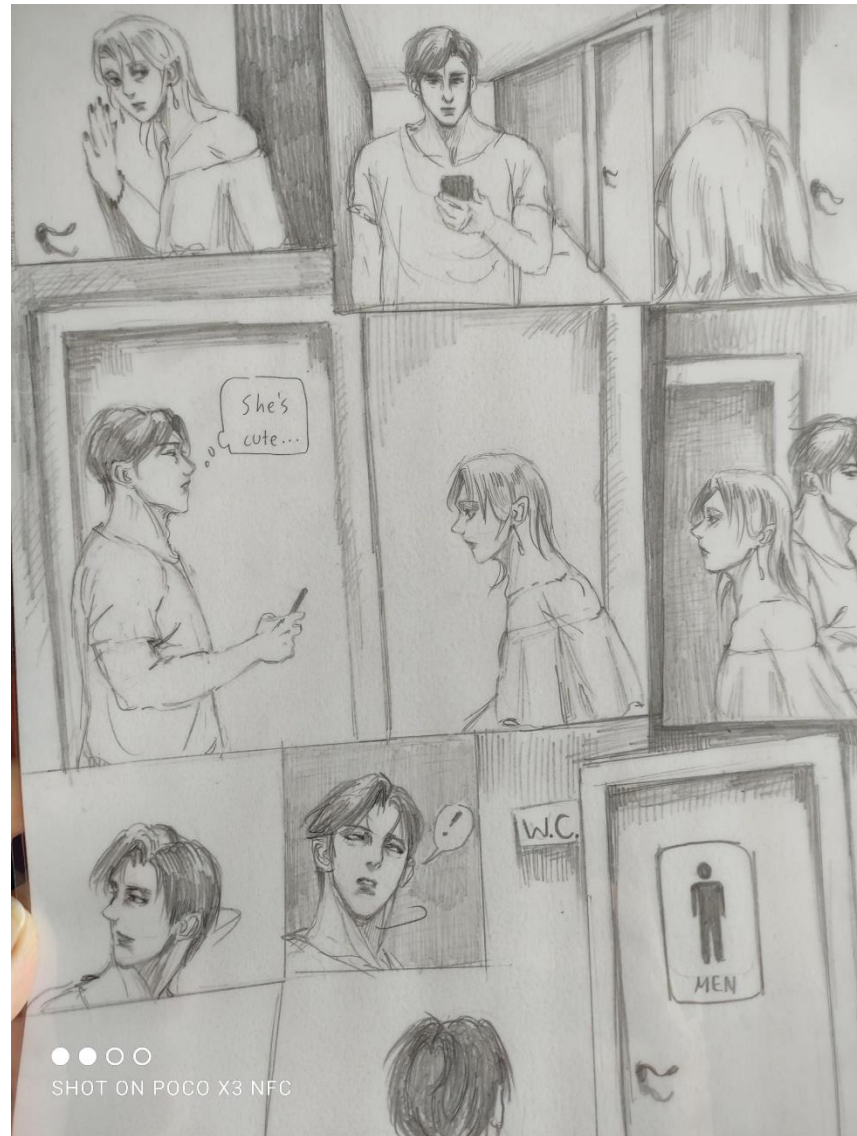

Internet Abuse

It shows a girl getting out of the toilets very frightened, because a boy followed her after exchanging some threaten messages on their mobile phones..

he says ironically:

-she is cute..

She got out of the men's toilet because she thought that he would follow her on the womens' one..

Thank you for your attention
