## Project Summary

### Objectives

The project aims to develop a comprehensive educational program focused on enhancing a diverse set of skills and knowledge in students through a well-rounded approach. This approach encompasses fostering cooperation skills, improving language proficiency, integrating information and communication technologies (ICT), advancing STEM subjects, and connecting theoretical knowledge to practical applications. The project utilizes various methods including project-based learning and research work.

### Activities

The objective of this project aligns with the principles of the European Green Deal, aiming to empower each participant to establish a dynamic, innovative, and interactive learning environment. Furthermore, it seeks to encourage collaboration in the realm of environmental education, focusing on climate change both in nature and globally. The project will involve the aggregation of informative and methodical materials for use during classes and extracurricular activities.

### Impact

The Erasmus+ program advocates for the cultivation of knowledge, skills, and attitudes related to climate change and sustainable development. Its purpose is to influence behavioral shifts at both individual and cultural levels, emphasizing the importance of sustainable development. This involves raising awareness, altering consumption patterns and lifestyles, and instilling a sense of responsibility in each participant towards the environment, resources, and a green lifestyle.
