

# ΕΡΓΑΣΙΕΣ ΤΩΝ ΠΑΙΔΙΩΝ ΤΟΥ Δ3 ΣΤ' ΑΓΓΛΙΚΑ

## UNIT 6-"Animals in Danger"

Στα πλαίσια του κεφαλαίου "Animals" του σχολικού βιβλίου, οι μαθητές του Δ3 αναζήτησαν πληροφορίες για ζώα υπό εξαφάνιση στους περιβαλλοντικούς ιστότοπους:

- [www.wwf.gr](http://www.wwf.gr)
- [www.archelon.gr](http://www.archelon.gr)
- [www.medasset.gr](http://www.medasset.gr)
- [www.euroturtle.org](http://www.euroturtle.org)

και φτιάξαν με το εργαλείο παρουσιάσεων Canva ψηφιακές αφίσες για το ζώακι που επιλέξαν. Πατήστε σε κάθε σύνδεσμο παρακάτω για να προβάλετε την κάθε αφίσα.

The Arctic Fox lives on the Arctic. Its colour is brown or white. It eats meat. There are about 5000-6000 in the world today.

# DON'T LET LYNX GO AWAY!

- This animal lives in European and North Macedonia.
- This animal looks like a cat.
- Its favourite lunch is the meat.
- The Lynx gives birth to one until three babies.
- In all the world are seven thousand animals.
- This animal is in danger because of the hunters. We can help this animal by stopping hunting.

I can send e-mail to all the world to stop hunt the Lynx

# RED DEER DON'T LET THEM GO AWAY!

- The red deer is the largest herbivore in Greece and definitely one of the most popular species of the Greek forests.
- Red deer has lived in Greece since as early as prehistoric times. As natural grazers, they have always played an important part in the base of the food pyramid.
- Red deer used to live throughout the Greek mainland. In only a few decades, their populations have been depleted so dramatically that the species is now considered critically endangered.

# ONLY 700 LEFT

SAVE ENDANGERED MONACHUS MONACHUS FROM EXTINCTION

Monachus Monachus lives in the Mediterranean sea. It weighs about 240-400 kilograms. It is about 80cm-2.4 meters long. It lives about 20-25 years. Males have got black fur and females brown or dark grey fur. It eats fish, octopuses or squid. Hunting and fishermen caused its population decrease. There are less than 700 seals in the world today.

**GREAT JOB!**
