

### FACTORIES

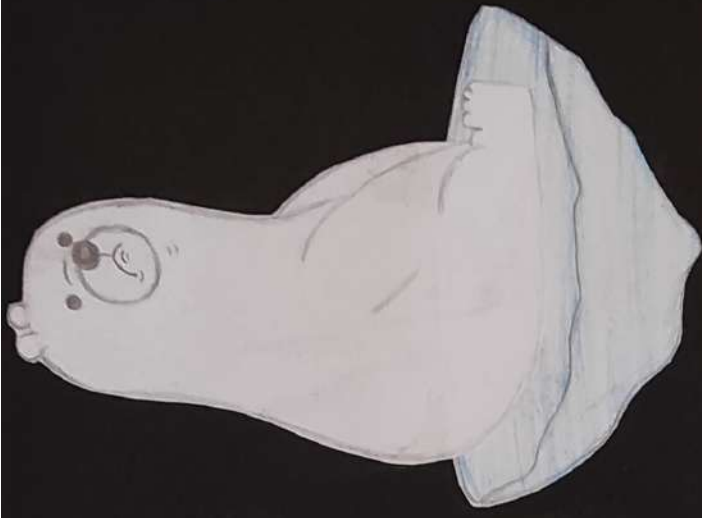

The pollution that is created from toxic and dangerous materials into our environment, does the planet come under threat and give poison to our health.

### CLIMATE CHANGE

### ICE MELTING

Even if we significantly curb emissions more than a 3rd on the world's glaciers will melt before 2100 when it comes 95% of the ice in the Arctic is gone.

### Sea water plastic pollution

1,15-2,41 million tons of plastic enters the ocean every year.

End plastic Addition, save marine animals
