This document certifies that you have adopted **an injured turtle named Truffle** from the ARCHELON sea turtle protection and rescue program in Glyfada - Rescue Centre. This adoption represents a commitment to protect these ancient animals and their habitats. Through this contribution, ARCHELON is able to continue its work for the protection of nature.

Thank you very much for your support. Together, we can make a difference in the fight to save sea turtles and our planet.

The ARCHELON Sea Turtle Rescue Centre is located in Glyfada, Attica, next to the sea, and operates with the help of volunteers from all over the world. The Centre hosts and treats about 70 injured or sick sea turtles every year, which are rescued in Greek coasts and seas. The most frequent causes of injuries are related to entanglements in fisheries, hook and plastic ingestions, collisions with boats. Once the rehabilitation of each turtle is completed, the animal is released back to its natural habitat, the sea.
