

WORKSHOP

Projection of Prometheus myth in to MAS Project

After being liberated by Hercules and wandered in time, Prometheus has finally found the way to help again humanity.

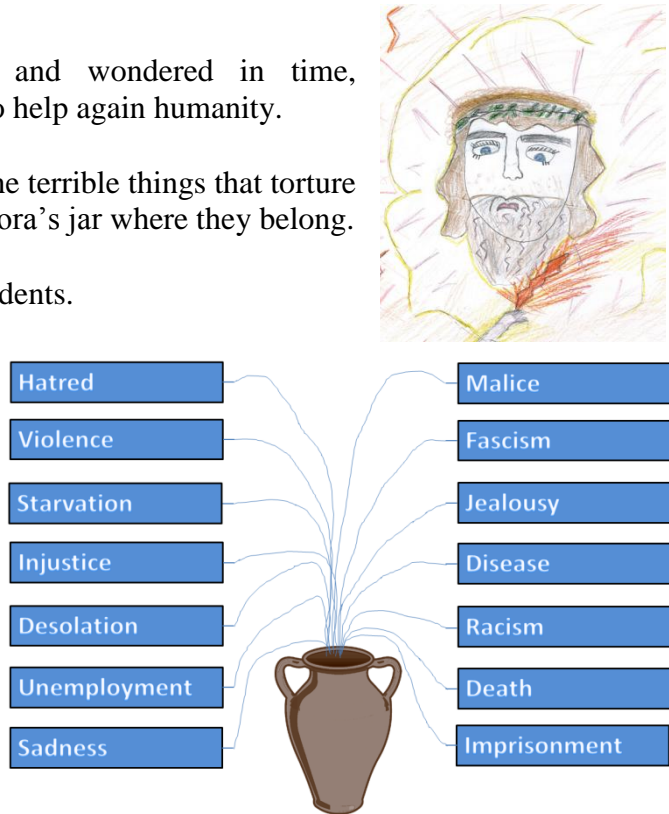

This time he is ready to capture **six** of the terrible things that torture humanity and lock them back into Pandora's jar where they belong.

But he needs a little help from MAS students.

Our mission is to help Prometheus decide which of these threats are most important to return back to the Pandora's jar in order to benefit mankind best.

Which of the threats would you choose?

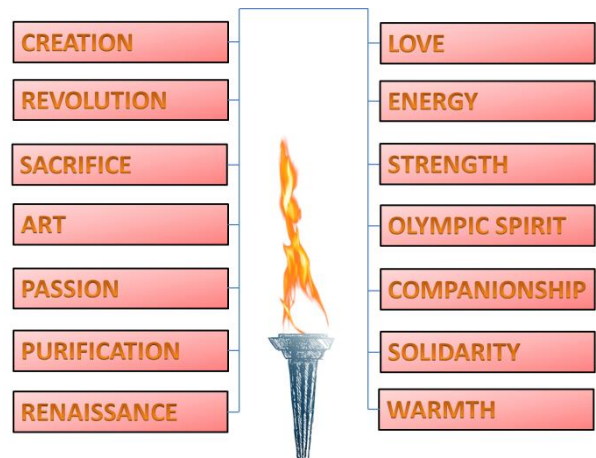

(Every team has to select one by justifying its choice)

In exchange of our help, Prometheus is offering us **six** sparkles of his fire that will inspire us throughout our project.

Which of the sparkles would you choose?

(Every team has to select one by justifying its choice)

- After the sparkles-meanings-words selection, use the [WordArt](#) online tool and the image of fire you prefer in order to create a word art picture from the words you have selected.
