Italy's Culture

- Italy is a country located in the middle of the Mediterranean Sea in Southern Europe, and its capital is called Rome. Also Italy is next to Greece, from where you are watching this presentation. Italy's culture is widely known for its beautiful Architecture (Pisa tower, Colosseum...), visual art, philosophy, theatre, music etc. (It is mostly known for its Art and Literature). The houses and buildings (old and new) are mostly yellow or white with roof tiles and it's not rare to find a furnace specifically for baking pizza. Also, Italian fashion has a long tradition, and it's not hard to understand that because Italy is where a big number of big clothing brands are located like Gucci, Versace etc.

The background of the slide is a photograph of a city street at night. In the foreground, there are several ornate, black metal street lamps with glowing yellow lanterns. The lamps are arranged in a way that they lead the eye towards the background. In the background, there is a large, domed building, likely a cathedral or a church, with its lights on. The sky is a deep blue, and the overall atmosphere is that of a quiet, historic city at night.

Italy's History

- We all know from history that Italy was home to the Roman Empire, which spread all across the Mediterranean sea and is considered one of the most powerful empire in world history. In its greatest extent in 117 AD the empire reached from South Britain all the way to Caspian sea and Egypt! Their emperor was called Julius Ceasar (you have probably heard of him or seen him in a movie), he rose and then died in the first century BC. As you may know already from history, after the fall of the Western Roman Empire in the 6th century it was re-conquered (reclaimed) by the Byzantine Empire with their Emperor, Justinian.

Italian Cuisine

- I wonder, really.. is there any person on this planet that hasn't tasted pizza? Or any Italian dish? Spaghetti maybe? The Italian cuisine has developed through centuries of social and political changes, with roots as far back as the 4th century BC. Italian cuisine in itself takes heavy influences, including ancient Greek, ancient Roman, Byzantine, and Jewish. Italian cuisine is noted for its regional diversity, abundance of difference in taste, and is known to be one of the most popular in the world. It is known for its fruits and vegetables (tomatoes, peppers, basil etc.) combined with pastry, for its big variety of wines and salami. And yes, Pineapple pizza may not be Italian, but it is a great dish choice for Pizza.

Motorsport in Italy

- Lastly, the most exciting part: Motorsport!! Except for its famous car Brands such as Lamborghini, Ferrari, Maserati, etc., motorsport is widely popular in Italy, and its history spans over a century back to the early 1900s. Today, Italy is considered a hub of motorsport in terms of racing venues, drivers, teams, and manufacturers. Having more than 10 racing circuits all across the country, its categories of racing varies, from F4 to F1, Nascar, Rallying, MotoGP...(you get the point).
