

SANTORINI RESIDENTS' ACTIVITIES NEAR THE VOLCANO

Santorini residents living near the Santorini Volcano perform several activities in order to make profit from the fertile ground and tourism, since the Santorini volcano is a very popular tourist attraction.

TOURISM:

- The volcano's history and the beautiful view from the volcano, such as the breathtaking sunset, which is one of the best in the world, is what makes it a very popular destination among tourists. Local people specializing in tourism (hotel managers, restaurant managers, etc.) make much money in the touristic period.

AGRICULTURE:

- All places near a volcano that has exploded sometime in history are very suitable for agriculture and food growth. It is proved that the soil is very fertile and it is very easy to grow and plant healthy fruit and vegetables. Farmers grow wealthy amounts of vegetables and fruit and make money from selling them to people or supermarkets.
