# Fourth Short-term exchange of groups of pupils in Aliveri, Evia, Greece

under the Erasmus+KA219 2017-20 project

"Generazione Web Europeo"

with code number 2017-1-IT02-KA219-036828_3
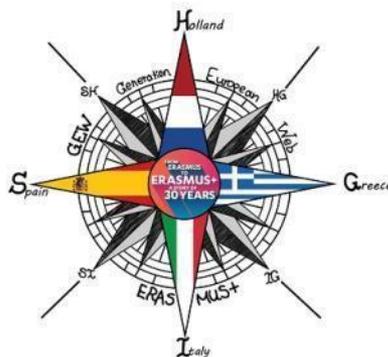

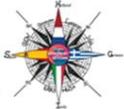

Discover Evia – Study case Group 2

- Suppose it is summer and there is a full moon next Sunday. Organise some events for the night at an Euboean beach with respect to the local community and the environment. Decide which authority you represent (a sports club, a cultural association, a trade association, a hotel resort).

A night at the beach

- *We are organizing a night at the beach, and there we will talk about the environment.*

- ***Environment** is everything that is around us. It can be living (biotic) or non-living (abiotic) things. It includes physical, chemical and other natural forces. Living things live in their environment. They constantly interact with it and adapt themselves to conditions in their environment.*

- *In the environment there are different interactions between animals, plants, soil, water, and other living and non-living things.*

![Erasmus+ logo and compass image]

- *Since everything is part of the environment of something else, the word environment is used to talk about many things.*
- *People in different fields of knowledge use the word environment differently.*

environment

- *In psychology and medicine, a person's environment is the people, physical things and places that the person lives with.*

- *The environment affects the growth and development of the person.*

- *It affects the person's behavior, body, mind and heart.*
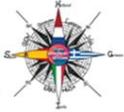

A person's environment

- A person's environment is the events and culture that the person lives in.

- Environment is everything around us.

- A person's beliefs and actions depend on his environment.

- For example Thomas Jefferson and Julius Caesar owned slaves. Modern people mostly think it is wrong to own slaves. But in Jefferson's and Caesar's *environments* slavery was normal. So, their actions did not look as wrong in their societies. Its simple definition is: Interaction between human and environment in the past.
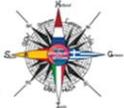

nature versus nurture

- *Discussions on nature versus nurture are sometimes framed as heredity vs. environment.*

- *These were a few thoughts about what are we going to discuss at night on the beach.*
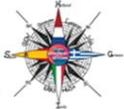

We are waiting for you
at Baluse Seaside Club,
next Sunday
at 21:00pm

BE THERE!!

Group 2

- *Fyllenia*
- *Anna Julia*
- *Andreas*
- *Dimitris*
- *Daniel*
- *Mariadele*
