

# Fourth Short-term exchange of groups of pupils in Aliveri, Evia, Greece

under the Erasmus+KA219 2017-20 project  
*“Generazione Web Europeo”*  
with code number 2017-1-IT02-KA219-036828\_3

# Discover Evia - Study case

## Group 6

- You are given the opportunity by the local authorities to organise activities, sports by the sea, on the sea and in the sea with respect to the local community and the environment. You can be financed with 100,000 Euros. What would you do?

# Sea Water activities and sports

- Evia island can be the first choice for an adventurous excursion due to its spectacular nature.
- Along Evia the length of coastline, with the crystal, clean and clear waters, the rocky calm beaches and in combination with the impressive morphology of the bottom and the huge undersea wealth is given the possibility for the development of every kind of sea activities during the whole year regardless of weather conditions, offering unique moments of relaxing, fun and exciting experiences.
- Especially the diverse morphology of Karystia region allows to start a business on a great number of sea activities such as:

# sailing

- Sailing is the most popular sport in Greece.
- It is an Olympic sport as well.
- Euboea is among the world's top 10 sailing destinations, according to National Geographic's book *Journeys of a Lifetime*.
- Sports lovers are invited to enjoy it.

# surfing

- Surfing came to Greece from late '60s and gained popularity after 2004.
- Greek surfers follow weather forecast and travel to remote locations such as Evia, the second largest Greek island, in search of conditions that produce suitable waves for the sport.

Photo taken on June 28, 2018 shows surfers ride on a wave in a beach near Petries, Evia Island, Greece. (Xinhua/Panagiotis Moschandreou)

# windsurfing – kitesurfing

- Windsurfing and Kitesurfing are exciting sports for all people, regardless of age and gender. A few hours in the water are enough for one to get started on the basics, that is, standing up and turning. A prerequisite, of course, is to know how to swim. The constant north winds, their duration, the closed and secure sea between the west coast of South Euboea and the Petali islands, as well as the strong streams in the narrow canal of the Euboean Gulf, make Marmari an ideal place for windsurfing and kitesurfing.

# water ski

- It is perhaps the most widespread and fun water sport.
- a sport that exercises, entertains and challenges you to test your limits.

# diving (scuba diving)

- Especially for Scuba Diving the area has many Dive Sites within the Gulf of Karystos but also in the wider area. It also has specialized diving centers (in Karystos) that provide diving equipment hire, escort, boat diving, diving training and all with complete safety and responsibility. The majestic reefs, the vertical rocks, the ship wrecks, the sea caves, the islets are just some of the underwater attractions that every one can admire.

# Extreme Sports

## Evripos Challenge Summing

It is a new water sport held in Halkida, in the Gulf of Euboea, and is the attempt of swimmers to pass under the "slippery" bridge of Halkida, swimming against the strong currents of Euboea. An extremely difficult sport that requires a lot of training and physical endurance, but also knowledge of the movement of currents. Athletes experience trial, endurance, adrenaline rush, emotion, pleasure and euphoria. It is organized by the non-profit association of sports and cultural events "MadWaters" based in Chalkida.

# bungee jumping

Bungee-Jumping - Free fall on the high bridge of Chalkis.

On the high bridge of Chalkida, which is 694.5 meters long, of which 210 meters in the air, width: 12.5 meters and free height: 35.5 meters, operates one of the most spectacular bungee sites in Greece.

Here the athlete, in addition to the other experiences he feels, can admire the breathtaking view of Eurippe's tide.

# cycling

- The route of South Evia is characterised, in its greater part, of good quality asphalt with low vehicle circulation. A dirt road, 15km long, is found approximately in the middle of the route. The ride consists of 5 climbs; the three middle ones are of average grade between 5% and 7%, which are less than 5km each. Owing to the morphology of the mountain mass of Ochi, the rider has to climb small parts of more than 13% average grade. The first contact with the Aegean sea is particularly impressive, especially during the last descent, it's quite joyful.

# trekking and mountain biking

- **Evia** is a perfect destination for hiking and mountain biking through dense forests, paddling, crossing impressive canyons and mountaineering to imposing peaks, swimming and snorkeling in crystal seas.
- Offers a **variety of historical sites** and major archaeological finds, but fortunately is quite unknown to the vast tourist crowds.
- **Evia is easily accessible** through various locations by a very short ferry ride or by car through the bridge connecting the mainland to Chalkida, over Evripos Channel, where you can witness the tide phenomenon of waters reversing direction every 6 hours!
- **Ideal for:** nature lovers, trekking enthusiasts, sea admirers and history seekers.
