

Experimental Senior-High School of Patras

English course
2015-2016

Teacher: Marisa Christopoulou

Computers in students' life today

Nikos Bill
Symeonidis Andrew
Tzanatos Michael

Introduction

Today, computers and the Internet, have become an important element in the life of the individual of all ages. Especially the young generation carries out a lot of work with the help of a computer.

The computer and the Internet have become an indispensable passion for them.

The young generation uses the computer and the Internet more successfully and much faster than the previous generations.

One of the main reasons for that is that they have been born in a world where information technology centers are equipped with lots of facilities.

Even though they use technology extensively, young people must be aware and orientate about the use of computers and the Internet.

Advantages of Internet use for students

- Many sources of information
- Freedom of where and when to study
- Easy communication between students (in group projects)
- Easy communication between teachers and students

Disadvantages of Internet use for students

- Inappropriate content
- Not reliable sources of information
- There is no face-to-face contact
- Not every student has Internet access or computer

Thank you!
