ENVIRONMENT

By: Nikol Tsoulou & George Stamatopoulos

ENGLISH COURSE 2015-2016

MEANING

- The natural environment encompasses all living and non-living things occurring naturally on Earth or some region thereof. It is an environment that encompasses the interaction of all living species.

FACTS

- Environmental protection is a practice of protecting the natural environment on individual, organizational or governmental levels, for the benefit of both the natural environment and humans. Due to the pressures of population and technology, the biophysical environment is being degraded, sometimes permanently. This has been recognized, and governments have begun placing restraints on activities that cause environmental degradation.

DO THIS...

- Recycle as many things as you can. Recycling things is the best way to lessen and avoid global warming and climate change.
 - Avoid burning garbage to lessen global warming. Learn to sell and recycle things to be practical nowadays.
 - Refrain from using air conditioner. Instead use electric fans than aircon. Air-condition has chlorofluorocarbon.
- 

AND THIS...

- **Plant vegetable on your own backyard. This will help you to prevent using cars to go to the market. This will also help in lessening air pollution.**
- **Don't throw trashes everywhere. This will help in lessening pollutions in air, water, and land.**

Thank you!
