Honorable Minister of Education,

The right to education is a basic right for all the children of the world.

The education we need is qualitative, inclusive, and embraces all the children, without discrimination!

In order to do this, we want to ask you to be fair, give us rights so that we're happier, relaxed (not stressed), and enjoy the lessons. The difficulty of the lessons should be catered for us that speak less Greek, so that we understand it the same.

Thank you!

The students of Senior High School of Intercultural Education of Eastern Thessaloniki
