

Frankenstein

This well-written book is written by Mary Shelley and it was published by Express Publishing. The book is trying to teach as a lesson which is we can't create humans because we aren't gods.

The story begins with a scientist who was called Frankenstein and he wants to be a god creating a human. So with his theories and some organs from dead people, he achieved to create a human being but this human was very different from humans. He was more like a creature .After all, the creature wants a woman to live with her so it threatened Frankenstein after many efforts he couldn't create and finally something wrong happened ... Can you imagine what happened ?

The book is fascinating and absorbing. I like this book because it is easy to understand the full main story of the book. Also I like the way the author trying to teach this important Lesson

You should definitely read this book. I am sure you will like it.
