

THE REVENGE

I am going to tell you about an adventure that I and my friends had last summer . We stayed in a house in a very nice area. We all had something in common: our love for cars.

One day, we made up our minds to go on a trip to Toronto for a car tournament. There, one of us had a car crash and he died. After research it was found than an opponent had sabotaged his car in order to kill him.

The rest of us decided to take revenge by burning his car. As a result, a big conflict began between us and the person that had killed our friend. In the end, due to economical problems and problems with his family he went to prison.

Few days later, he was found dead inside his prison cell in a blood lake with a knife in his hand. He had committed suicide.

The end of the story

Flash back.

What led him kill himself?

While he was in jail, he kept being threatened by the other prisoners. These people could kill him. The combination of their behaviour and the bad prisons' conditions, made him kill himself.
