$u = 72\frac{Km}{h} = \frac{72000m}{3600s} = 20m/s$

$u = 40m/s = 40.\ \frac{10^{-3}Km}{\frac{1}{3600}h} = 40.10^{-3}.3600Km/h = 144Km/h$
