# What do you think are the strengths of the project you have been involved in so far?

What do you think are the strengths of the project you have been involved in so far?  
22 απαντήσεις

It is so collaborative and interesting!! We all learn new things!!

The exploratory discovery of learning by students, the networking of school pairs, the use of technology

Collaborative activities, student-centered studies

The very good cooperation and communication of the members

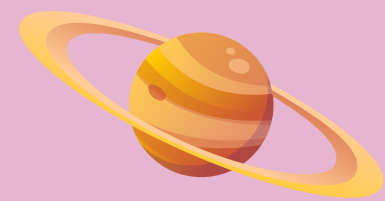

Cooperation, innovations

teamwork, creativity

Cooperation between children and teachers, mutual help and the joy of common results

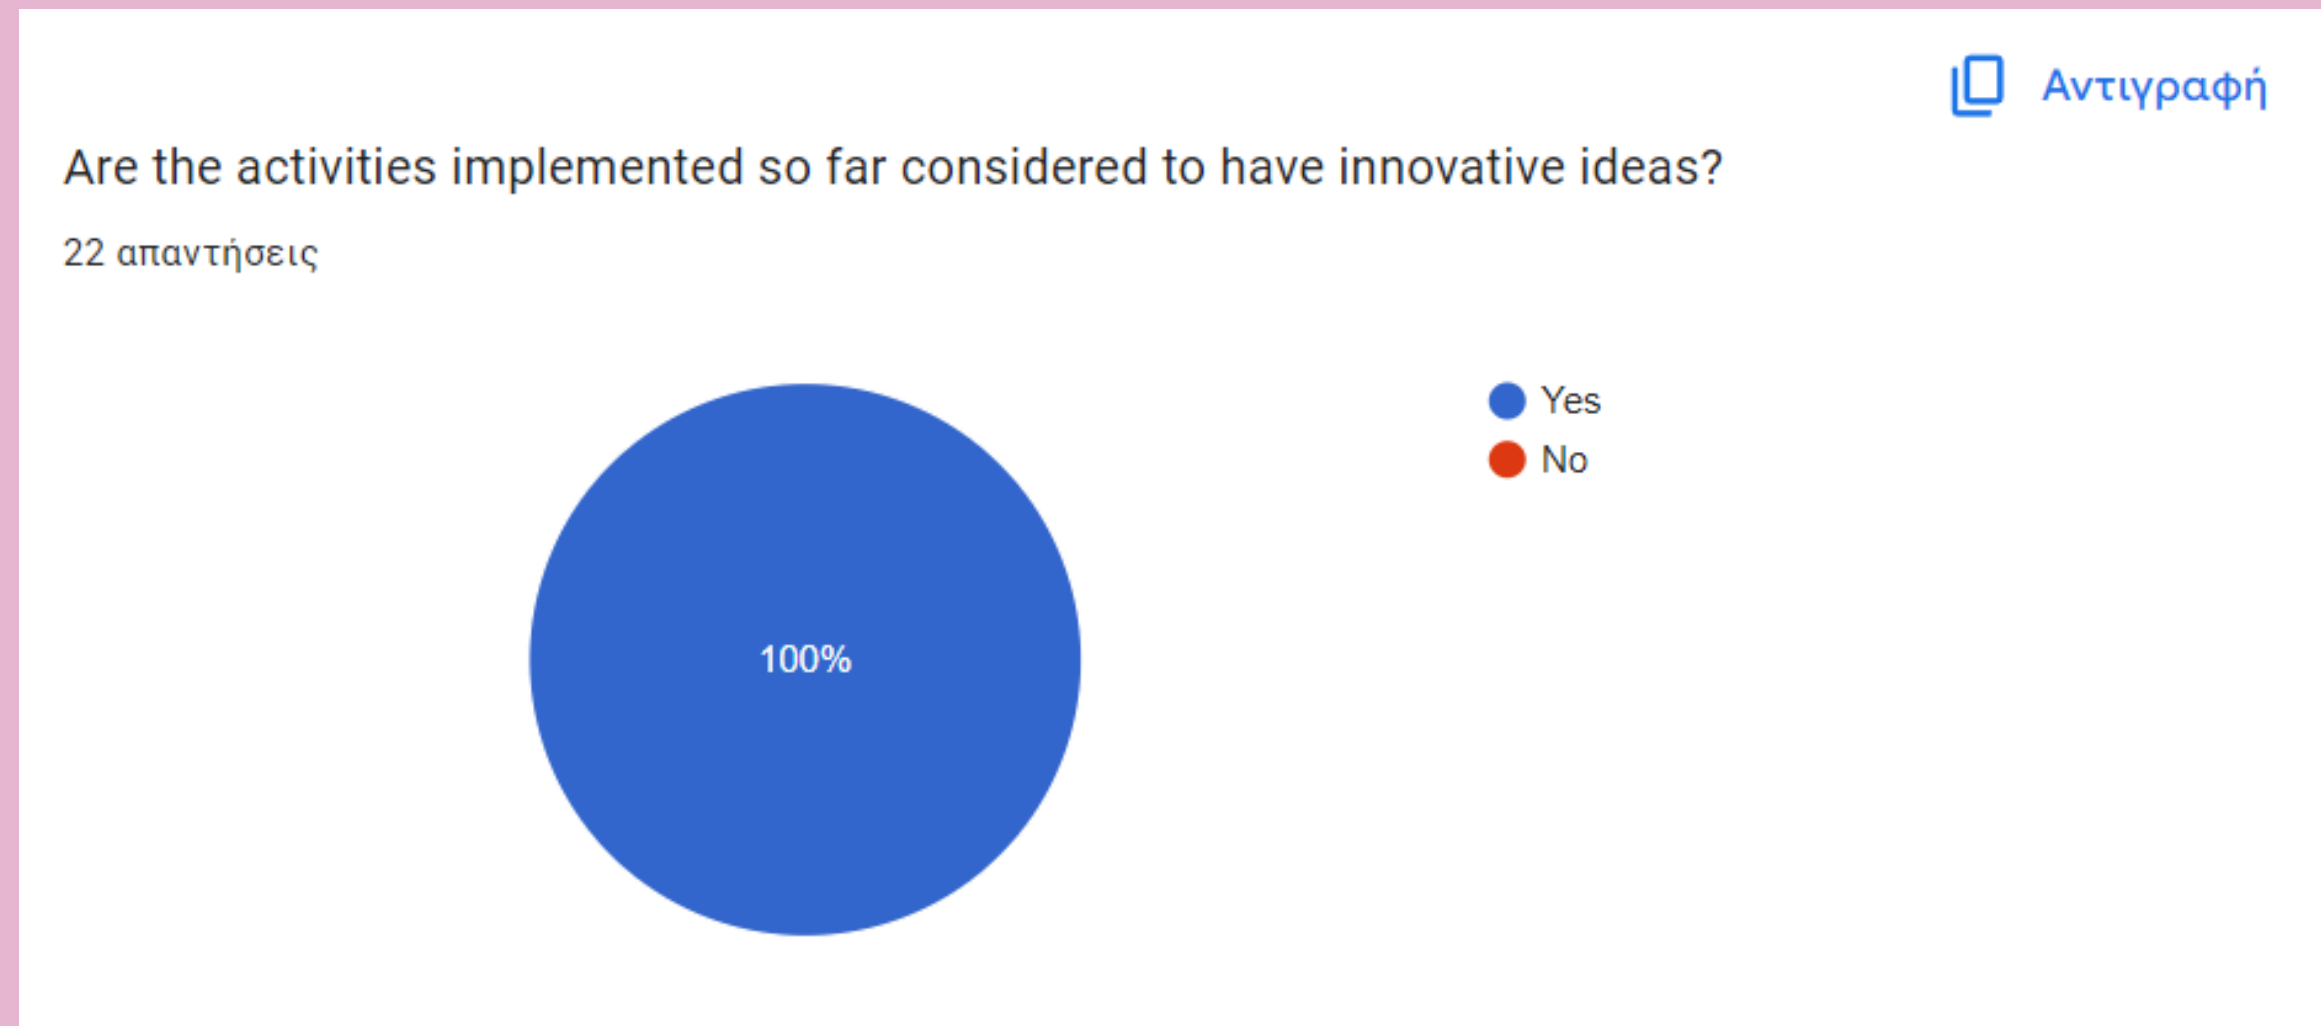

New word in english but also the use of digital, as well as sharing work, comparing and improving together is of fundamental importance

**The experience with this particular e-Twinning project shows a number of strengths, including effective collaboration, communication, innovation and educational benefits.**

**The teachers also focus on the creativity of the project, mutual help and the use of digital tools.**

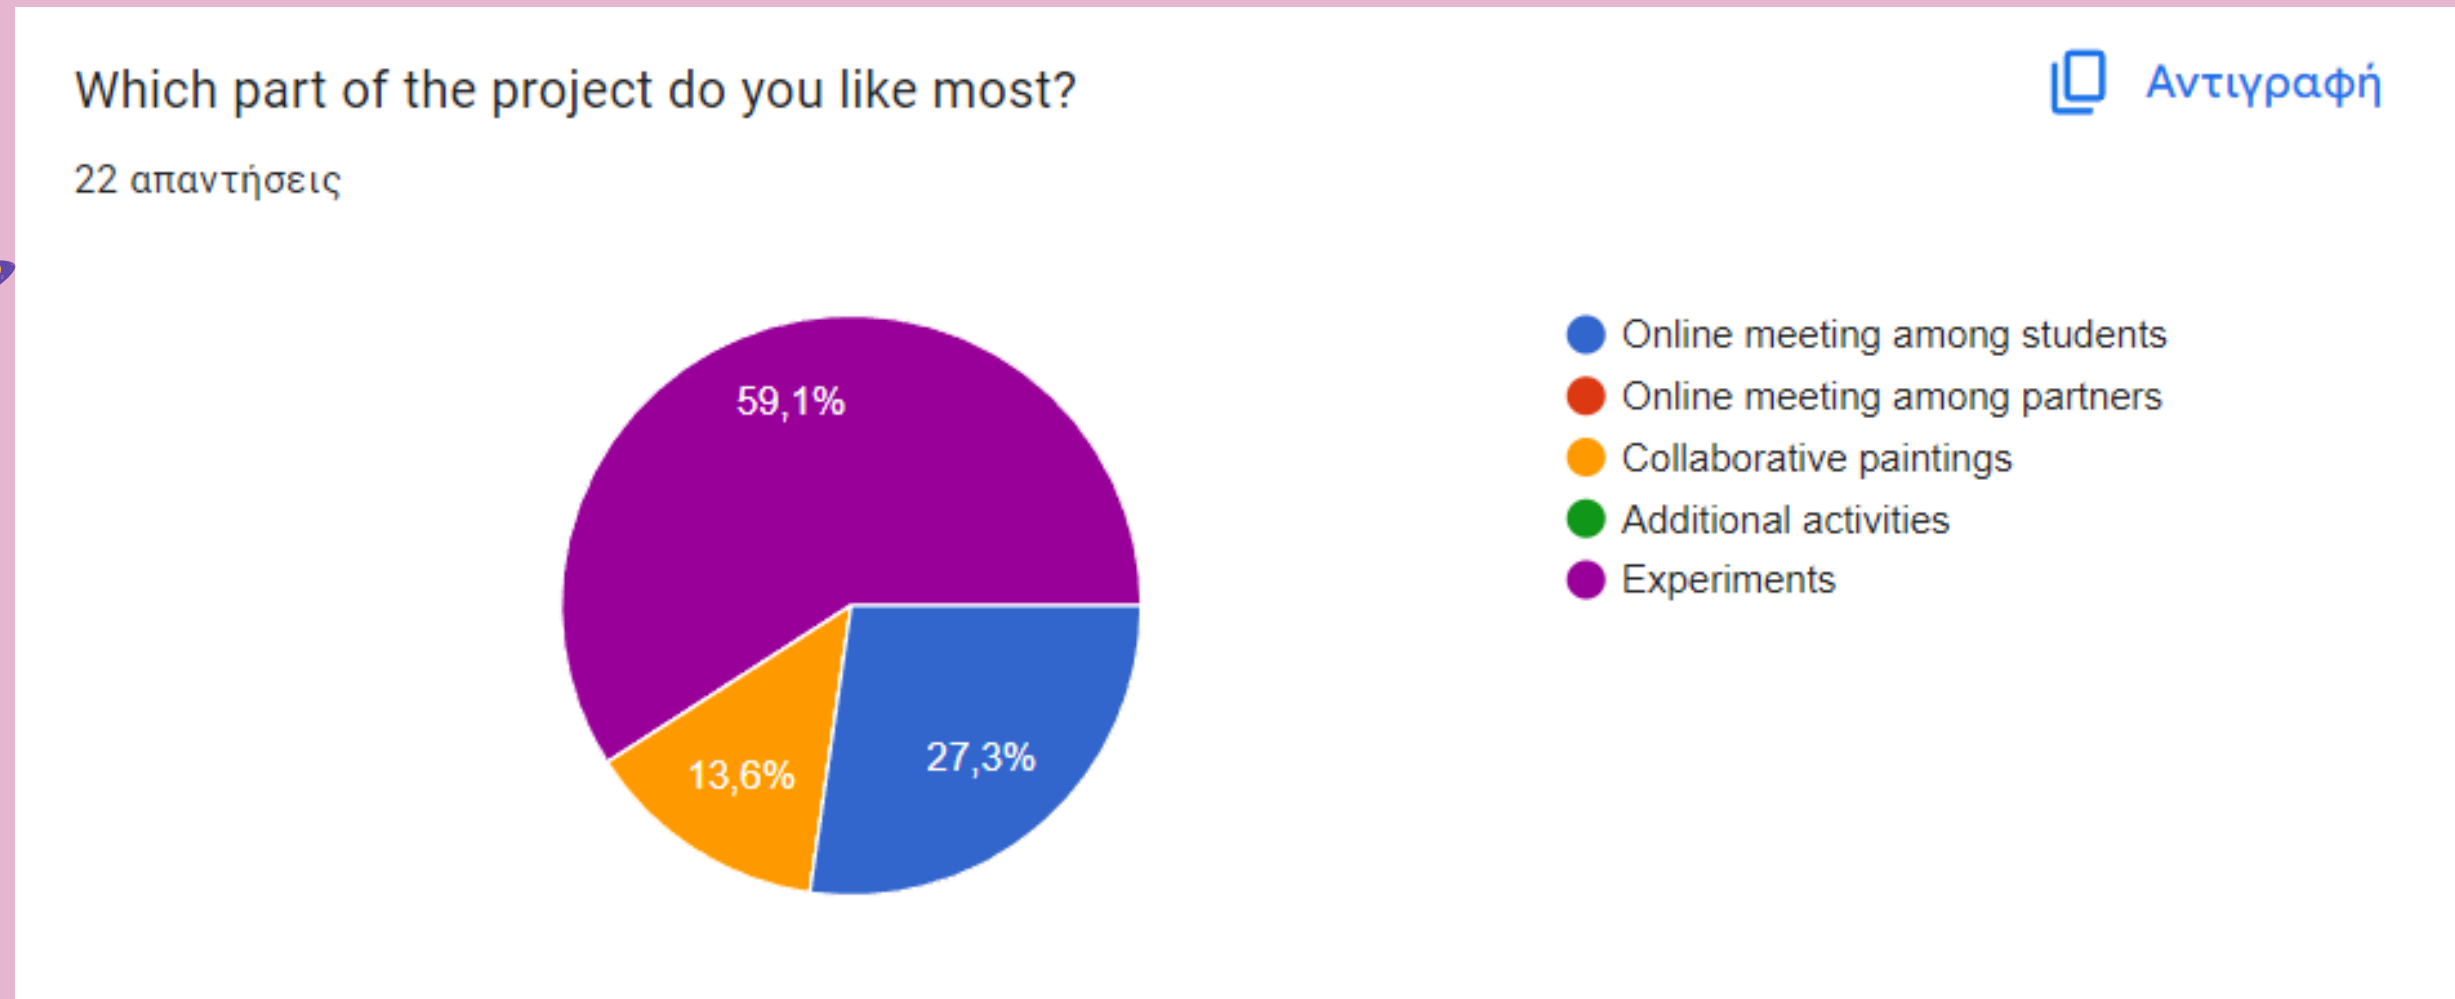

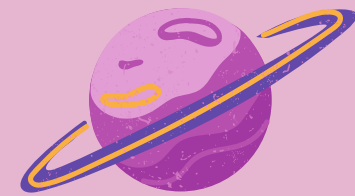

# Are the activities implemented so far considered to have innovative ideas?

**100% of teachers consider that the activities implemented so far have innovative ideas.**

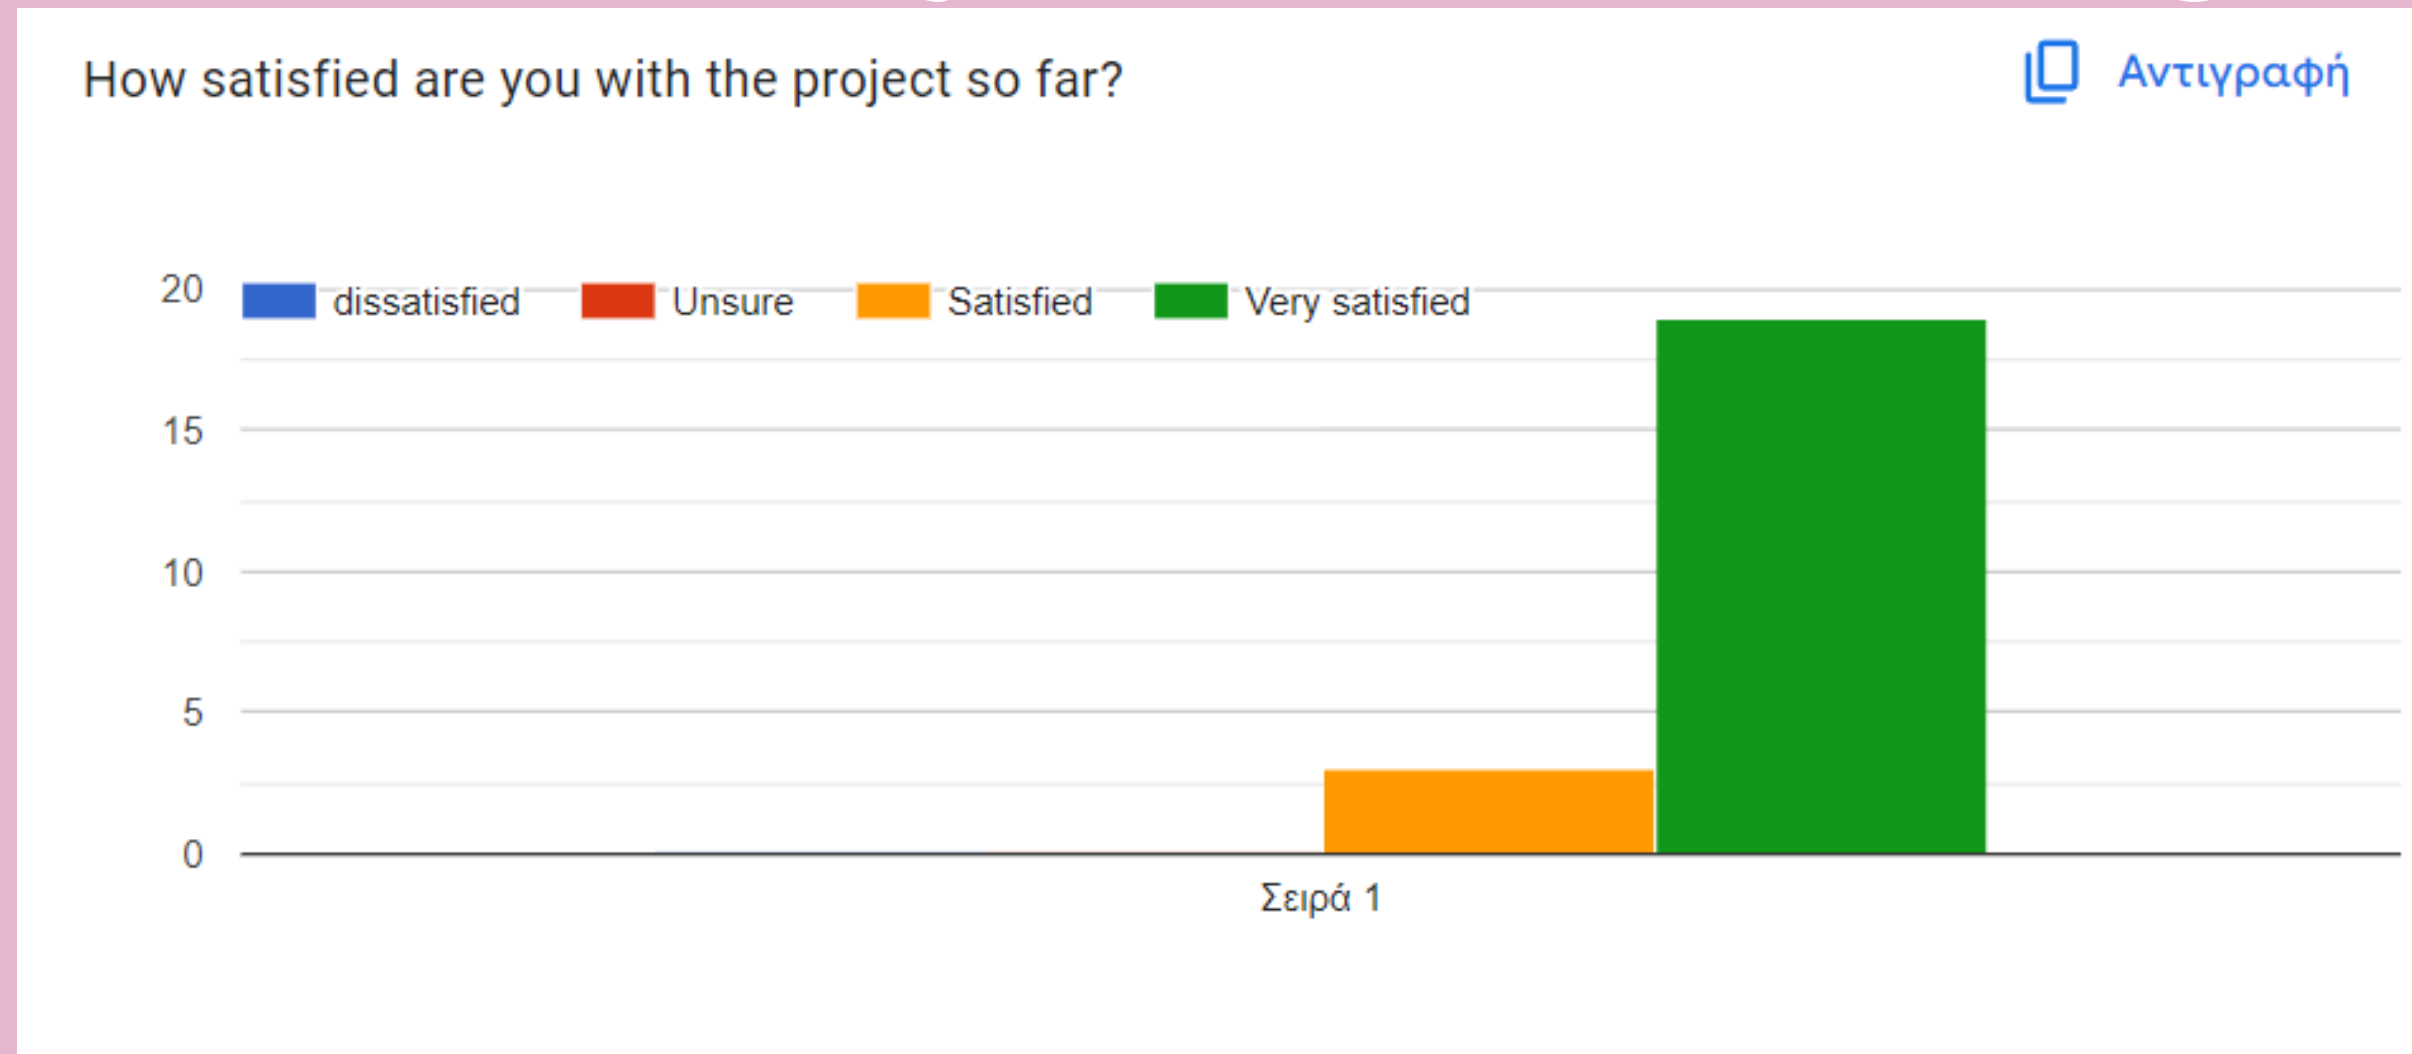

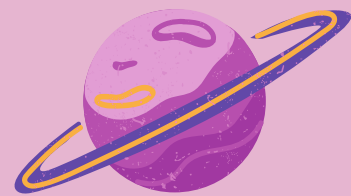

# Which part of the project do you like most?

**From the responses of the teachers, it appears that 59.1% like the experiments they implement in the project, 27.3% prefer the online meetings among students and 13.6% enjoy the collaborative drawings.**

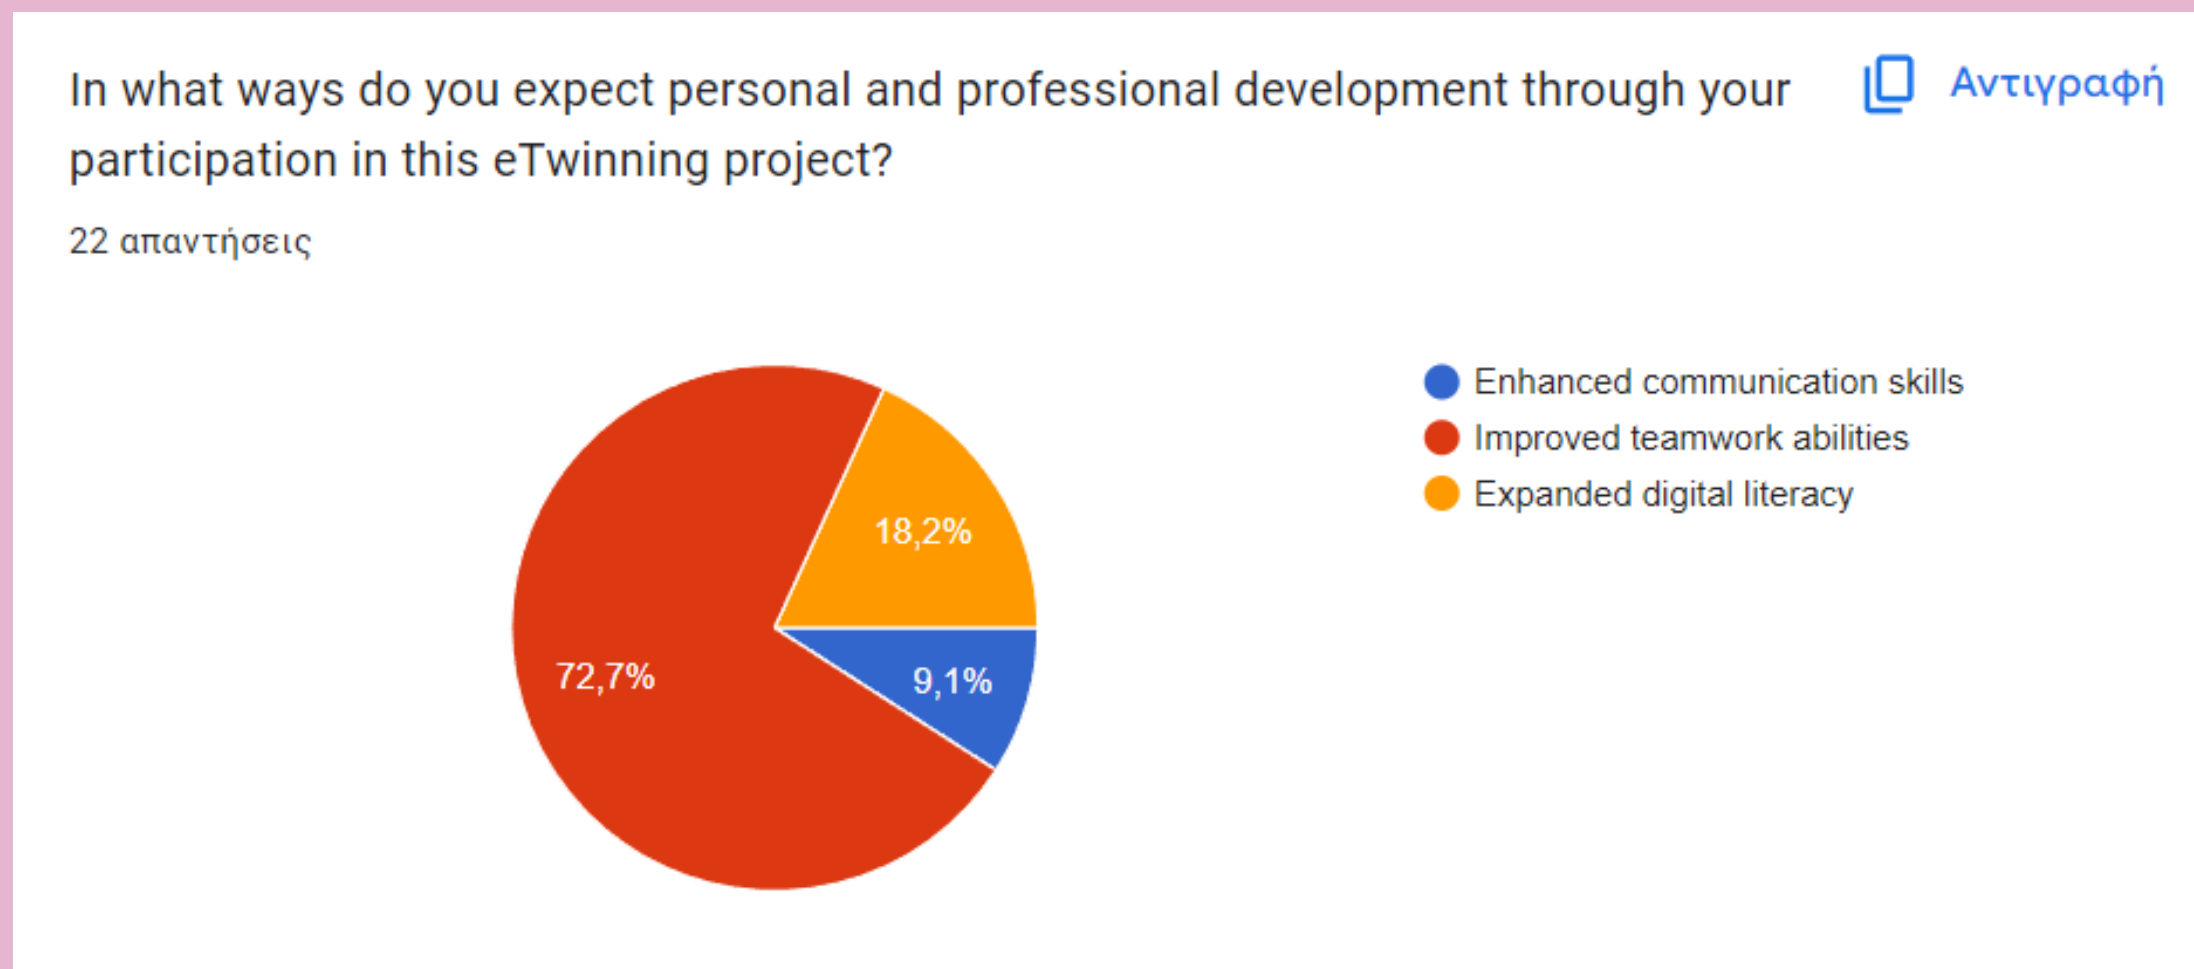

# How satisfied are you with the project so far?

**The majority of teachers are very satisfied with the progress of the project so far and a very small percentage is satisfied**

# In what ways do you expect personal and professional development through your participation in this eTwinning project?

**Teachers believe that they will develop personally and professionally because they will improve their teamwork skills (percentage 72.7%), their digital skills (percentage 18.2%) and their communication skills (percentage 9.1%)**

# What comments or observations would you add to strengthen the project?

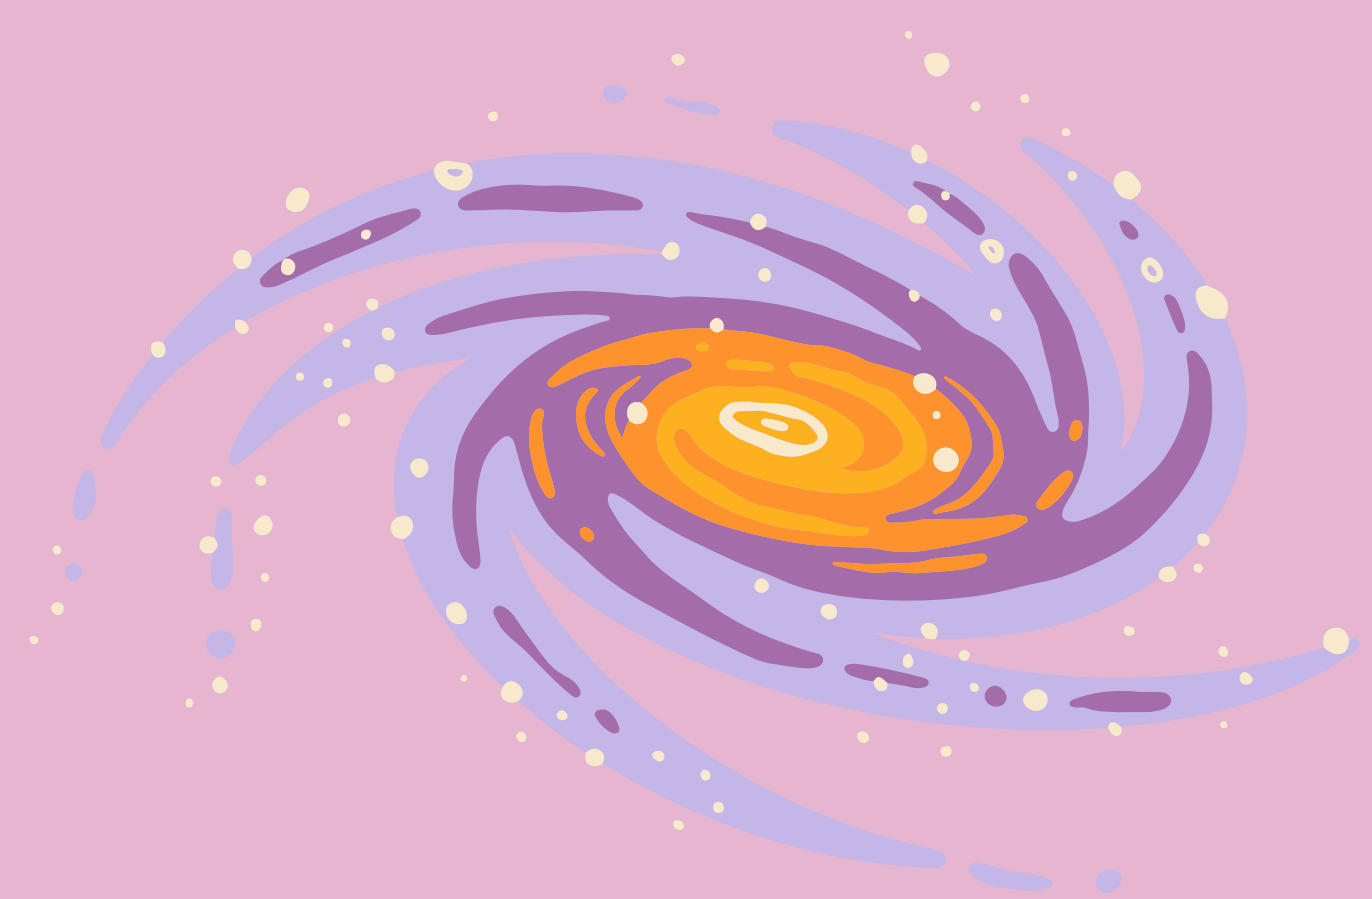

**The majority of teachers are very enthusiastic about the project. To strengthen it, they suggest more online meetings between students and more collaborative activities. There is only one participant who thinks that there are many details and this causes some difficulties.**

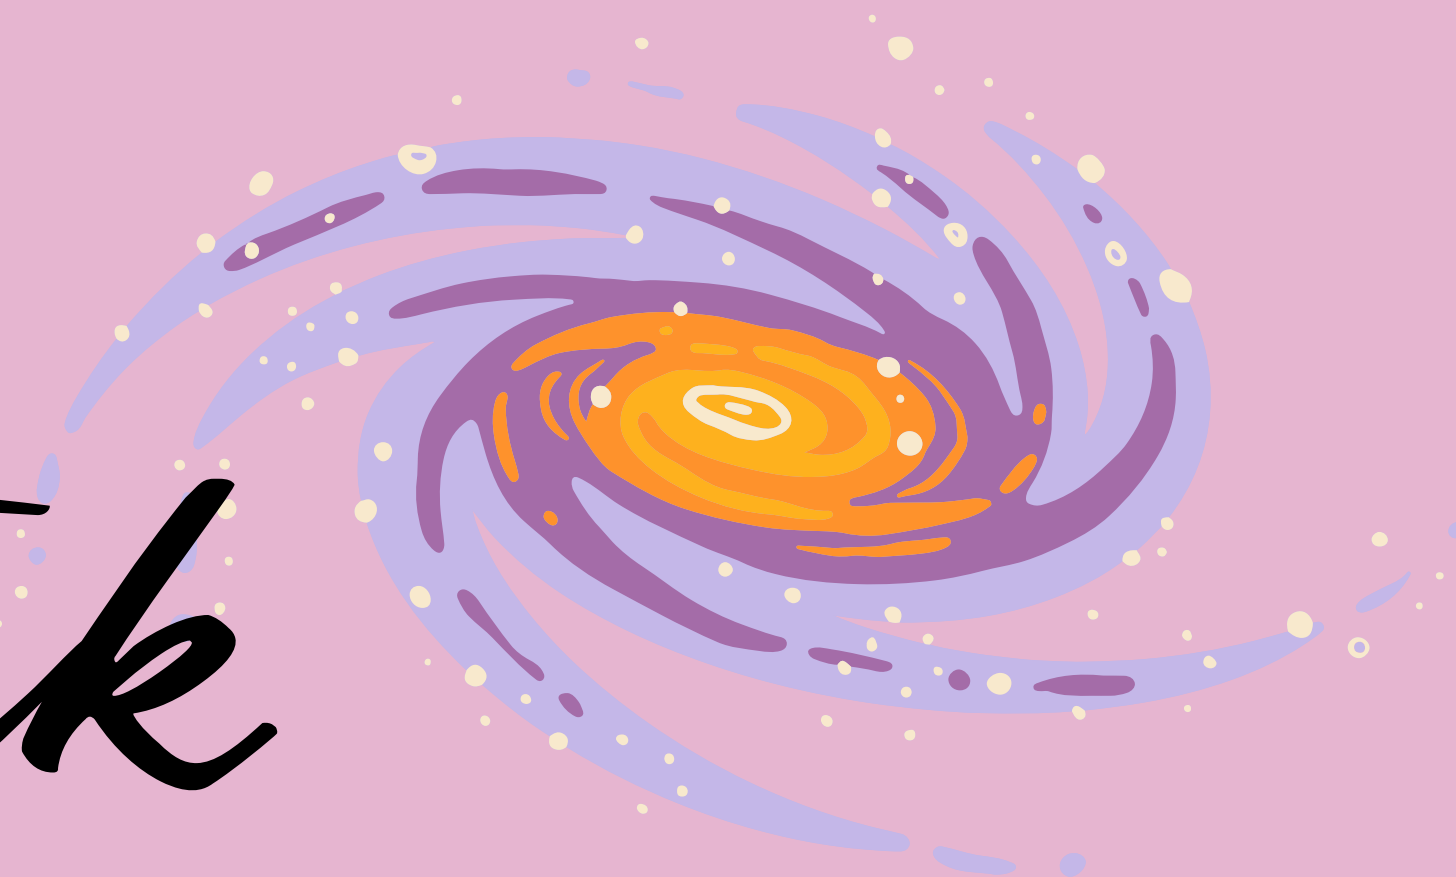

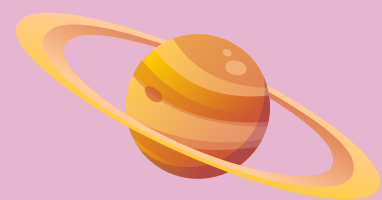

What comments or observations would you add to strengthen the project?

- Keep on the same way!!
- Sometimes it can be difficult to find out what our real focus is because there are so many details. Other than that everything is perfect.
- Perhaps more meetings among students
- More collaborative activities
- An incredibly interesting and well-organized project
- This is my first work on etwinning and I'm so excited that everything is perfect
- since it's the first experience, i think so far i don't feel like adding or taking away, i prefer to observe and make people understand
- it is a well organized project

**According to the results, the participating teachers are very satisfied with the project and its course and believe that it improves them personally and professionally.**

*Thank  
You*
