

**I never
really
understood
maths...
it's weird...**

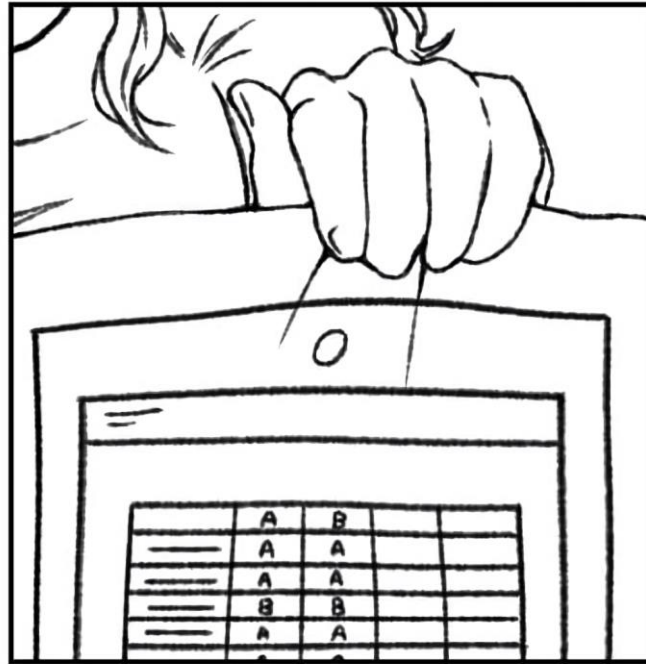

7 years ago

**from when
I was
younger,
creativity
was
something
that made
me feel
free. made
me feel
like I can
be smart
with my
own
ways...**

**without
some
grades
telling
me
how
smart I
am...**

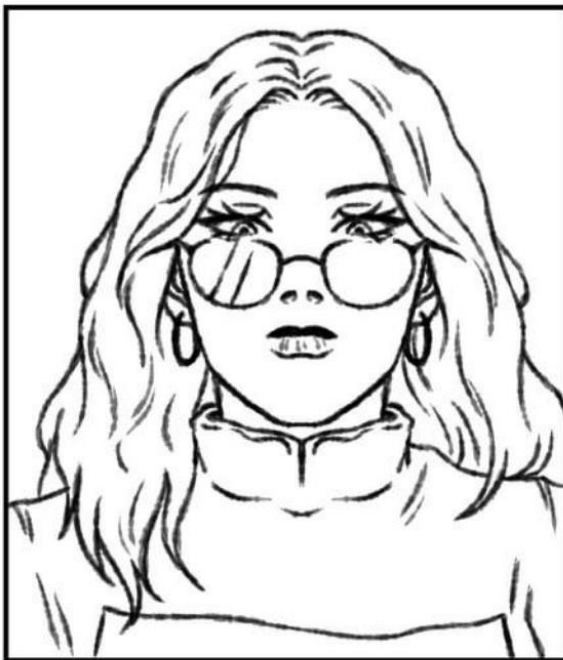

**I used to
be good
at them,
but
whenever
i didn't go
well... I
would get
punished**

**but creativity
never
punished
me... it never
made my
parents
disappointed,
it never
made me
disappointed**

today

**it rewards
you for your
time, but...
so does
maths. the
differences
is... one
has rules**

**and one
doesn't...
maths are
important, just
as important
as my art... I
appreciate the
art in math,
and I
appreciate
math in art. I
might not be
the smartest,
but I use math
differently
than others.**
